INTRODUCTION 1

HISTORICAL BACKGROUND TO THE STUDY *1*

MOTIVATION FOR THE STUDY *3*

AIMS OF THE STUDY *5*

APPROACH IN THE STUDY *6*

STRUCTURE OF THE REPORT *8*

DESCRIPTION OF THE STUDY AREA 9

MATERIALS AND METHODS 12

METHODOLOGY FOR SITE SELECTION *12*

PROCEDURE FOR SEDIMENT SAMPLING, HANDLING AND STORAGE *13*

PROCEDURE FOR SEQUENTIAL CHEMICAL EXTRACTION OF SEDIMENTS *15*
Fraction 1: Exchangeable 15
Fraction 2: Bound to carbonates 15
Fraction 3: Bound to iron and manganese oxides 16
Fraction 4: Bound to organic matter 16

PROCEDURE FOR RADIOLOGICAL ANALYSIS *17*
Initial sample preparation 17
Residual liquid fraction 17
Presentation of Analytical Results 17
METHODOLOGY FOR FIELD GAMMA SPECTROMETRY *18*
PROCEDURES FOR ENVIRONMENTAL FATE MODELLING OF RADIONUCLIDES *20*
RISK METHODOLOGY EMPLOYED IN THE PRESENT STUDY *21*
RESULTS OF THE INVESTIGATION **22**
SEQUENTIAL CHEMICAL EXTRACTIONS *22*
RESULTS OF RADIOANALYSIS ON SEQUENTIAL CHEMICAL EXTRACTS *22*
FIELD GAMMA SPECTROMETRY *22*
RADIONUCLIDE ENVIRONMENTAL FATE MODELLING **23**
REACTIONS CONSIDERED IN ENVIRONMENTAL FATE MODELLING *23*
MODEL FOR AVERAGE RIVER WATER IN THE CATCHMENT *24*
THEORETICAL DEPTH PROFILE OF OXIDATION POTENTIAL *25*
SCENARIOS MODELLED *26*
Eh-pH PREDOMINANCE DIAGRAMS OF SELECTED RADIONUCLIDES *26*
Eh-pH Diagrams of Uranium 28
Eh-pH Diagram of Thorium 31
Eh-pH Diagram of Radium 32
Eh-pH Diagram of Polonium 33
Eh-pH Diagram of Lead 34
EVALUATION OF SCENARIOS WITH RESPECT TO RADIONUCLIDE MOBILITY *35*
Scenario 1: Resuspension of sediment into water of existing quality (July, 1999) 35
Scenario 2: Infiltration of surface water at extremes of recorded pH values 35
Scenario 3: Movement of the redox profile due to bioturbation or input/decrease of carbon 36
Scenario 4: Significant elevation of the redox profile by exposure to atmospheric oxygen. 38
WHAT DO THE FIELD GAMMA MEASUREMENTS TELL US? **39**
FIELD GAMMA MEASUREMENTS - PROXY FOR WHAT RADIONUCLIDES? *41*
WHAT DO THE SEQUENTIAL EXTRACTIONS TELL US? **43**
HAS URANIUM ACCUMULATED IN THE SEDIMENT? *43*
ANALYSIS BY PHASE OF SEQUENTIAL EXTRACTION *44*
CHEMICAL FORM OF URANIUM IN SEDIMENTS - ANALYSIS OF RELATIVE QUANTITIES OF URANIUM EXTRACTED BY Eh-pH DIAGRAMS: *46*
Does released U come from precipitated Uranium solids? 46
Does released U come from environmental solid phases? 47
ANALYSIS BY TOTAL U-238 AT EACH SITE *49*

SECULAR DISEQUILIBRIUM AS INVESTIGATED BY RATIOS OF SEDIMENT RADIONUCLIDE ACTIVITIES *52*
Origin of Uranium in The Sediments 52
Disequilibrium - Enrichment or depletion ? 52
Possible Age of Disequilibrium Processes 52

RISK ASSESSMENT **53**

SCENARIO EVALUATION *53*
Scenarios Simulated by Chemical Equilibrium Modelling 53
Scenarios Simulated by Sequential Chemical Extraction 53
Scenarios Observed in Field Site Assessments 53

RISK QUOTIENT ESTIMATION *54*

CONCLUSIONS **55**

RECOMMENDATIONS **57**

REFERENCES **58**

APPENDIX 1: CHEMICAL ATTRIBUTES OF SEDIMENT COMPONENTS **62**

GENERAL CHARACTERISTICS OF SEDIMENTS *62*
Organic Matter 64
(Hydrous) Ferric Oxides 65
Manganese Oxides 66
Calcium Carbonates 66

METAL BINDING SEDIMENT COMPONENTS IN ANOXIC CONDITIONS *68*
Sulphide Component 69
Organic Matter 70

APPENDIX 2: CONSIDERATIONS WITH RESPECT TO SEDIMENT SAMPLING, HANDLING AND ANALYSIS **71**

SAMPLING WITH CORE SAMPLERS *71*

SAMPLE HANDLING PROCEDURES *72*

IDENTIFICATION OF SEDIMENT CHEMICAL PHASES AND ASSOCIATED METALS *72*
Sequential Extraction Techniques 72

CHARACTERISTICS OF SEQUENTIALLY EXTRACTED SEDIMENT FRACTIONS *73*
Fraction 1: Exchangeable 73
Fraction 2: Bound to carbonates 73
Fraction 3: Bound to iron and manganese oxides 73
Fraction 4: Bound to organic matter and sulphides 74
Fraction 5: Residual or inert fraction 74

APPENDIX 3: GENERAL CONSIDERATIONS OF ESTIMATING RISK **75**

GENERAL CHARACTERISTICS OF RISK ASSESSMENTS *75*
Exposure and Effects Estimation 75
Probabilistic profiles and the Quotient method 75
Tiers of Risk Assessments 76

THE ROLE OF EXPOSURE SCENARIOS IN EXPOSURE ASSESSMENT *76*

GENERAL PROCEDURE FOR EXPOSURE ANALYSIS *77*
Describing dimensions of exposure 77
Evaluating Exposure Pathways 77
Identifying Receptor 77
Estimating exposure and dose 77

APPENDIX 4: MASSES USED IN SEDIMENT SEQUENTIAL CHEMICAL EXTRACTION **78**

APPENDIX 5: SEDIMENT RADIONUCLIDE SAMPLING DATA SHEET **79**

APPENDIX6: DATA USED IN CHEMICAL MODELLING **80**

APPENDIX 7: FIELD WATER QUALITY AND GPS READINGS **84**

APPENDIX8: RADIOLOGICAL ANALYSES AS RECEIVED FROM THE AEC **85**

APPENDIX 9: FIELD GAMMA MEASUREMENTS **88**

APPENDIX 10: CONCENTRATIONS OF RADIONUCLIDES IN Bq/kg AND ppm **89**

APPENDIX 11: RATIOS OF ACTIVITY OF SELECTED RADIONUCLIDES **91**
