GLOSSARY xiii

1. INTRODUCTION

1.1 PURPOSE OF THIS MANUAL 1-3
1.2 GROUNDWATER QUALITY MANAGEMENT POLICY 1-3
1.3 THE SPECIFIC NEED FOR MICROBIAL MONITORING 1-5
1.4 CURRENT CONTEXT OF NATIONAL MICROBIAL MONITORING 1-6
1.5 THE STRUCTURE OF THIS MANUAL 1-7

2. GROUNDWATER BASICS

2.1 INTRODUCTION 2-3
2.2 GROUNDWATER BASICS 2-3
2.2.1 Groundwater in South Africa 2-3
2.2.2 The hydrological cycle 2-4
2.2.3 Aquifers 2-4
2.2.4 Boreholes 2-8
2.2.5 Aquifer recharge 2-9
2.2.6 Pollution and aquifer vulnerability 2-9
2.2.7 Groundwater management 2-10
2.3 GROUNDWATER MICROBIAL POLLUTION 2-11
2.3.1 Introduction 2-11
2.3.2 Potential sources of microbial pollution 2-12
2.3.3 Survival of microorganisms 2-15
2.3.4 Movement of microorganisms 2-16
2.4 IMPACTS 2-19

3. NATIONAL IMPLEMENTATION

3.1 NATIONAL OBJECTIVES 3-3
3.2 IMPLEMENTATION ISSUES 3-6
3.2.1 Introduction 3-6
3.2.2 Responsibilities 3-6
3.2.3 Balancing bottom-up and top-down management 3-6
3.2.4 Anticipating the problems 3-6

3.2.5 National coordination ... 3-7
3.2.6 Demonstrating early successes ... 3-8
3.2.7 Creating awareness ... 3-9
3.2.8 Creating capacity ... 3-9
3.2.9 Sustaining commitment ... 3-10
3.2.10 Future research needs ... 3-10
3.2.11 Implementation timetable ... 3-11
3.3 PRIORITISATION PROCESS ... 3-12
3.4 NATIONAL IMPLEMENTATION PROCESS ... 3-15
3.4.1 Overview ... 3-15
3.4.2 Choose new area (WMA) ... 3-16
3.4.3 Create monitoring intent in region (WMA) ... 3-16
3.4.3.1 Market microbial monitoring regionally ... 3-16
3.4.3.2 Appoint Regional Monitoring Coordinator ... 3-16
3.4.3.3 Cost regional implementation ... 3-17
3.4.3.4 Incorporate in catchment management strategy ... 3-17
3.4.4 Coordinate implementation ... 3-17
3.4.5 Ensure national sustainability ... 3-17
3.4.5.1 Coordinate nationally ... 3-17
3.4.5.2 Facilitate continuity in regions ... 3-18
3.4.5.3 Report regularly ... 3-18
3.4.5.4 Revise regularly ... 3-18

4. MONITORING FRAMEWORK

4.1 INTRODUCTION ... 4-3
4.2 GENERIC DESIGN CONSIDERATIONS ... 4-3
4.2.1 Introduction ... 4-3
4.2.2 Overlap with existing programmes ... 4-4
4.2.3 Monitoring borehole site selection ... 4-4
4.2.4 Sampling frequency ... 4-5
4.3 QUALITY ASSURANCE PLAN ... 4-7
4.3.1 Introduction ... 4-7
4.3.2 QA data quality objectives ... 4-7
4.3.3 QA roles and responsibilities ... 4-7
4.3.4 QA activities and data collection ... 4-7
4.3.5 QA data evaluation ... 4-8
4.3.6 QA systems and performance reviews ... 4-8
4.3.7 QA corrective actions ... 4-8
4.3.8 QA reports to management ... 4-9
4.4 NATIONAL MONITORING DESIGN ... 4-9
4.4.1 Introduction ... 4-9
4.4.2 Objectives ... 4-9
4.4.3 Monitoring variables ... 4-9
4.4.4 Procedures for selection of monitoring sites ... 4-10
4.4.4.1 General philosophy ... 4-10
4.4.4.2 Choosing the catchment ... 4-11
4.4.4.3 Significant faecal pollution sources ... 4-12
4.4.4.4 Monitoring effectiveness of containment ... 4-12
4.4.4.5 Location of strategic point-of-use boreholes ... 4-13

4.4.4.6 Dedicated versus pumping boreholes 4-14
4.4.5 Borehole construction 4-15
4.4.6 Sampling frequency 4-15
4.4.7 Sampling procedures 4-17
4.4.7.1 Introduction 4-17
4.4.7.2 Equipment 4-17
4.4.7.3 Pump disinfection 4-18
4.4.7.4 Borehole purging 4-18
4.4.7.5 Sampling 4-19
4.4.7.6 Sample preparation 4-20
4.4.7.7 Sample delivery 4-20
4.4.8 Data management 4-20
4.4.9 Annual data assessment and reporting 4-20
4.4.9.1 Typical data assessments 4-20
4.4.9.2 Annual report structure and contents 4-21
4.4.10 Interim *ad hoc* reports 4-27
4.4.11 Report delivery 4-27
4.5 BOREHOLES MONITORING CONTAINMENT 4-27
4.5.1 Introduction 4-27
4.5.2 Establishing groundwater flow characteristics 4-28
4.5.3 Establishing filtration effectiveness 4-29
4.5.4 Microorganism travel times 4-30
4.5.5 Learning from experience 4-31

5. ROLES & RESPONSIBILITIES

5.1 INTRODUCTION 5-3
5.2 MANAGEMENT MODELS 5-3
5.2.1 Introduction 5-3
5.2.2 Model 1: Direct management of samplers and analysts 5-4
5.2.3 Model 2a: Using CMAs as agents 5-5
5.2.4 Model 2b: Using CMAs sub-contracting local managers 5-6
5.3 NATIONAL POLICY MAKER 5-7
5.3.1 Summary of Role 5-7
5.3.2 Typical Role Player 5-7
5.3.3 Responsibilities 5-7
5.4 NATIONAL COORDINATOR 5-8
5.4.1 Summary of Role 5-8
5.4.2 Typical Role Player 5-8
5.4.3 Responsibilities 5-8
5.4.3.1 Facilitate National Implementation 5-8
5.4.3.2 Facilitate Regional Implementation 5-8
5.4.3.3 Communicate with National Concerned Parties 5-8
5.5 NATIONAL CONCERNED PARTIES 5-9
5.5.1 Summary of Role 5-9
5.5.2 Typical Role Player 5-9
5.5.3 Responsibilities 5-9
5.6 REGIONAL MONITORING COORDINATOR 5-9
5.6.1 Summary of Role 5-9
5.6.2 Typical Role Player 5-10

5.6.3 Responsibilities 5-10
5.6.3.1 Initialisation of new monitoring programmes 5-10
5.6.3.2 Ensure sustainability 5-10
5.6.3.3 Communicate with Regional Concerned Parties 5-10
5.7 REGIONAL CONCERNED PARTIES 5-10
5.7.1 Summary of Role 5-10
5.7.2 Typical Role Player 5-11
5.7.3 Responsibilities 5-11
5.8 LOCAL MANAGER 5-11
5.8.1 Summary of Role 5-11
5.8.2 Typical Role Player 5-11
5.8.3 Responsibilities 5-11
5.9 LOCAL CONCERNED PARTIES 5-12
5.9.1 Summary of Role 5-12
5.9.2 Typical Role Player 5-12
5.9.3 Responsibilities 5-12
5.10 ANALYST 5-12
5.10.1 Summary of Role 5-12
5.10.2 Typical Role Player 5-12
5.10.3 Responsibilities 5-13
5.10.3.1 Sample Preservation 5-13
5.10.3.2 Sample Analysis 5-13
5.10.3.3 Results transmission 5-13
5.11 SAMPLER 5-13
5.11.1 Summary of Role 5-13
5.11.2 Typical Role Player 5-13
5.11.3 Responsibilities 5-13
5.11.3.1 Preparation 5-13
5.11.3.2 On site 5-14
5.11.3.3 Delivery 5-14
