

TABLE OF CONTENTS

EXECUTIVE SUMMARY	i
ACKNOWLEDGEMENTS	xvii
TABLE OF CONTENTS	xix
LIST OF TABLES	xxv
LIST OF FIGURES	xxvii
LIST OF ABBREVIATIONS	xxix
CHAPTER 1	1
1.1 Introduction and rationale	1
1.2 Aim	1
1.3 Study area	1
1.4 Report layout	2
CHAPTER 2	3
LITERATURE SURVEY	3
2.1 Introduction	3
2.1.1 Endocrine system	3
2.1.2 Endocrine disruption	4
2.1.3 Types of adverse effects expected from EDCs	5
2.2 Chemical residue analysis for estrogenic substances	11
2.3 Endocrine disruptive metals (EDMs)	13
2.3.1 Cadmium (Cd)	14
2.3.2 Arsenic (As)	15
2.3.3 Lead (Pb)	16
2.3.4 Mercury (Hg)	17
2.4 <i>In vitro</i> and <i>in vivo</i> bioassays	18
2.4.1 The Recombinant Yeast Screen Assay (YES)	19
2.4.2 The T47D-KBluc reporter gene assay	20
2.4.3 The MDA-kb2 reporter gene assay	20
2.4.4 Catfish vitellogenin enzyme-linked immunosorbent assay	21
2.5 Bio-analysis of dioxin and dioxin-like PCBs	22
2.6 Biosentinels	26
2.6.1 Sharptooth catfish	26
2.6.2 African clawed frog	34
2.6.3 Freshwater snails	38

2.6.4	Small mammals	41
CHAPTER 3		45
THE URBAN NATURE RESERVE (UNR) AND OVERVIEW OF PROJECTS		45
3.1	Introduction	45
3.2	Synoptic description of the geology and geohydrology in the UNR	48
3.2.1	Geology	48
3.2.2	Geohydrology	48
3.3	Previous projects	49
3.3.1	Aneck-Hahn, 2002	49
3.3.2	Barnhoom et al., 2002	50
3.3.3	Barnhoom et al., 2004	51
3.3.4	Muteveri, 2004	51
3.3.5	Barson, 2004	52
3.3.6	Mlambo, 2004	53
3.3.7	Mbizi, 2004	54
3.3.8	Moolman, 2004	54
3.3.9	Vos, 2005	55
CHAPTER 4		56
ANALYTICAL CHEMISTRY OF WATER AND SEDIMENT		56
4.1	Organic chemical analyses	56
4.1.1	Introduction	56
4.1.2	Materials and Methods	56
4.1.3	Results	60
4.1.4	Discussion	67
4.2	Metal analysis	69
4.2.1	Introduction	69
4.2.2	Material and methods	69
4.2.3	Results	69
4.2.4	Discussion and conclusion	73
CHAPTER 5		75
IN VITRO BIOASSAYS FOR ESTROGENIC ACTIVITY		75
5.1	Recombinant cell bioassay (<i>Saccharomyces cerevisiae</i> (YES) assay)	75
5.1.1	Introduction	75
5.1.2	Materials and Methods	77

5.1.3	Results	80
5.1.4	Discussion	88
5.1.5	Conclusion	90
5.2	Reporter gene assays	90
5.2.1	Introduction	90
5.2.2	T47D-Kbluc assay	90
5.2.3	MDA-kb2 assay	91
5.2.4	Comments	92
5.3	ER-Calux reporter gene assay	92
5.3.1	Introduction	92
5.3.2	Results	92
5.3.3	Discussion	93
5.3.4	Conclusion	94
5.4	Catfish vitellogenin (cf-VTG) in male fish	94
5.4.1	Introduction	94
5.4.2	Materials and methods	95
5.4.3	Results	96
5.4.4	Discussion and conclusion	97
Chapter 6		98
Bio-analysis of dioxin and dioxin-like PCBs		98
6.1	Introduction	98
6.2	Materials and methods	98
6.2.1	Choice of environmental matrix to be analysed	98
6.2.2	Chemical extraction	98
6.2.3	Bio-assay	99
6.2.4	Data analysis	99
6.3	Results	100
6.4	Discussion	100
6.5	Conclusion	102
CHAPTER 7		103
SENTINEL SPECIES AS BIOMARKERS OF EDC EXPOSURE		103
7.1	The sharptooth catfish (<i>Clarias gariepinus</i>)	103
7.1.1	Introduction	103
7.1.2	Material and Methods	103
7.1.3	Results	104

7.1.4	Discussion	109
7.1.5	Conclusions	113
7.2	African Clawed frog, <i>Xenopus laevis</i>	113
7.2.1	Introduction	113
7.2.2	Materials and Methods	114
7.2.3	Results	115
7.2.4	Discussion	119
7.3	Freshwater snail (<i>Bulinus tropicus</i>)	120
7.3.1	Introduction	120
7.3.2	Materials and Methods	120
7.3.3	Results	122
7.3.4	Conclusion	126
7.4	Small mammals	127
7.4.1	Introduction	127
7.4.2	Materials and Methods	127
7.4.3	Results	131
7.4.4	Discussion	133
CHAPTER 8		136
ACTIVE BIOMONITORING		136
8.1	Sharptooth catfish, snails and midguts	136
8.1.1	Introduction	136
8.1.2	Materials and Methods	137
8.1.3	Results	140
8.1.4	Discussion	140
8.1.5	Conclusions	142
8.2	Cell death in feral sharptooth catfish (<i>Clarias gariepinus</i>)	142
8.2.1	Introduction	142
8.2.2	Materials and methods	143
8.2.3	Results	146
8.2.4	Discussion	154
CHAPTER 9		157
AQUATIC PLANTS		157
9.1	Introduction	157
9.2	Materials and Methods	158
9.2.1	Sampling sites	158

9.2.2	Plant sampling	159
9.2.3	Sediment and water sampling	160
9.2.4	Microwave digestion for sediments and plants	161
9.3	Results	162
9.3.1	Wetland macrophytes used for the study	162
9.3.2	Analysis of heavy metals in plant root tissue	162
9.4	Discussion and conclusion	167
9.4.1	Heavy metal analyses in plants	167
CHAPTER 10		168
SOUTH AFRICAN SCORING SYSTEM (SASS)		168
10.1	Introduction	168
10.2	Materials and Methods	169
10.2.1	Sampling sites	169
10.2.2	Macroinvertebrate sampling	170
10.2.3	Using SASS5 score sheet	171
10.3	Results	171
10.3.1	Low-flow sampling 2004 (LF1)	171
10.3.2	High-flow sampling 2005 (HF1)	173
10.3.3	Low-flow sampling 2005 (LF2)	174
10.3.4	High-flow sampling 2006 (HF2)	174
10.3.5	Summary of ASPT for all biotopes	175
10.3.6	Integrated habitat assessment (IHAS)	175
10.4	Discussion and conclusion	176
CHAPTER 11		178
HEALTH RISK ASSESSMENT		178
11.1	Introduction	178
11.2	The Health Risk assessment process	178
11.2.1	Hazard Identification	179
11.2.2	Dose Response Assessment	180
11.2.3	Exposure assessment	185
11.2.4	Risk characterization	185
11.3	Endocrine disrupting chemicals in the UNR	186
11.3.1	Hazard assessment	187
11.3.2	Dose calculation (Exposure concentration)	192
11.3.3	Trans-media transfer calculations	193

11.3.4 Risk Characterization	196
11.4 Discussion	201
11.4.1 Quantitative Human Health Risk Assessment	201
11.4.2 Qualitative Risk Assessment	201
11.4.3 Uncertainty	203
CHAPTER 12	204
COMPREHENSIVE DISCUSSION	204
12.1 Objective	204
12.2 Control sites	204
12.3 Chemical levels measured	206
12.4 Endocrine disrupting metals	209
12.5 The health risk assessment	209
12.6 Final conclusion	210
CHAPTER 13	211
SUGGESTED TOOLKIT	211
13.1 Chemical analyses	211
13.2 Compounds of concern	211
13.3 <i>In vivo</i> bioassays	213
13.3.1 Sample preparation	214
13.3.2 Water extraction procedure	214
Standard Operating Protocol	215
