EXECUTIVE SUMMARY	i
ACKNOWLEDGEMENTS	vii
TABLE OF CONTENTS	ix
LIST OF FIGURES AND TABLES	xii
TERMINOLOGY	xiii

PART A: INTRODUCTION TO ASSET MANAGEMENT

CHAPTER 1 GENERAL	1
1.1 Introduction	1
1.2 Motivation for the research project	1
1.3 Methodology in project execution	2
1.3.1 Water cycle processes and infrastructure assets	2
1.3.2 Asset operation management principles	3
1.3.3 Information systems	4
1.3.4 Legislation related to asset management	5
1.4 Literature search and electronic reviews	5
1.5 Field activities and methods of data acquisition	7
CHAPTER 2 VALUE AND MANAGEMENT OF ASSETS	9
2.1 Current asset management practices in SA	9
2.2 Asset management practices elsewhere in the world	10
2.2.1 United Kingdom	10
2.2.2 Australia and New Zealand	13
2.2.2.1 The Australian asset management (AM) process	13
2.2.2.2 The New Zealand asset management (AM) process	14
2.2.2.3 Summary on Australian and New Zealand AM process	15
2.3 The need for asset management	16
2.4 SA's legislative environment	17
2.4.1 National Water Resources Strategy (NWRS)	17
2.4.2 National Water Act (NWA)	18
2.4.3 Water Services Act (WSA)	19
2.4.3.1 Water Services Development Plan (WSDP)	20
2.4.3.2 National Information System for water services	23
CHAPTER 3 ASSET MANAGEMENT PLANS	24
3.1 What is an Asset Management Plan?	24
3.1.1 What should a typical Asset Management Plan comprise?	24
3.1.2 What should a typical Asset Management Plan deal with?	24
3.1.3 Benefits from implementing an Asset Management Programme	25
3.2 Types of Asset Management Plans	26
3.2.1 Basic Asset Management Plan	26
3.2.2 Advanced Asset Management Plan	26
3.2.3 Standard Asset Management Plan	26
3.2.4 Total Asset Management Plan	27

CHAPTER 4	ASSET MANAGEMENT APPROPRIATE CASE STUDIES	28
4.1	The field case studies	28
4.2	Case study 1 - City of Durban water supply to the poorest communities (metropolitan water supply system)	28
4.2.1	Background	28
4.2.2	Infrastructure assets value and level of service	29
4.2.3	Asset management practice and capacity	29
4.2.4	Asset management implementation issues	29
4.3	Case study 2 - Thaba Nchu peri-urban and rural water supply (regional water supply system)	29
4.3.1	Background	29
4.3.2	Infrastructure assets value and level of service	30
4.3.3	Asset management practice and capacity	30
4.3.4	Asset management implementation issues	30
4.4	Case study 3 - Municipality of Balfour and Siyathemba (rural town water services system)	31
4.4.1	Background	31
4.4.2	Infrastructure assets value and level of service	31
4.4.3	Asset management practice and capacity	31
4.4.4	Asset management implementation issues	32
4.5	Case study 4 - Motlhaba and Ntswana-le-Metsing village water supply	34
4.5.1	Background	34
4.5.2	Infrastructure asset value and level of service	34
4.5.3	Asset management practices and capacity	36
4.5.4	Asset management implementation issues	36
CHAPTER 5	CONCLUSIONS	37
PART B:	GUIDELINES	
CHAPTER 6	ASSET MANAGEMENT PRACTICE AND REGISTERS	39
6.1	Introduction	39
6.2	Definition of a national standard for asset registers	39
6.2.1	Requirements of an asset register	40
6.2.2	Components of a national standard for asset registers	40
6.2.3	Which assets should be on the register	41
6.2.4	The minimum set of information to be recorded	41
6.2.5	Recording the changes to assets	42
6.2.6	Capturing the data	43
6.3	System analysis and setting up the register	44
6.3.1	Service levels	44
6.3.2	Asset identification and classification	45
6.3.3	Performance indicators	47
6.3.4	Condition grading	47
6.3.5	Risk assessment	48
6.4	Register maintenance	48
6.5	Asset register outputs	49
6.5.1	Asset valuations	49
6.5.2	Performance and condition upgrading	50

CHAPTER 7	PREPARATION OF ASSET MANAGEMENT PLANS FOR WATER SERVICES	51
7.1	Asset management planning in SA water services sector	51
7.2	How to prepare a standard asset management plan	51
7.3	Extent of asset management plans	51
7.4	Life cycle asset management	52
7.4.1	Whole life cycle principle	53
7.4.2	Life cycle cost reduction	56
7.5	Asset valuation guidelines	56
7.6	Asset condition assessment guidelines	58
7.7	The role of asset register in asset life cycle costing	59
7.8	Capacity expansion and prediction of demand for services	59
CHAPTER 8	RECOMMENDATIONS	60
REFERENCES		61
APPENDICES		64
Appendix A	Recommended values of useful life for assets of a typical water services authority/provider	65
Appendix B	Practical example of asset valuation for a service reservoir (2Ml)	66
Appendix C	Practical example of life cycle asset costing : pumping station (very small system)	67
Appendix D	Recommended contents of a more advanced asset management plan	68
Appendix E	User Guide to the Impahla software	75
