LIST OF TABLES

<i>Table 1: Comparison of mean and standard deviation (SD) values of 1971 and 1991 samples (57 sites) at Springbok Flats. Computed t-test (paired) results show significant changes in TDS, TAL, pH, Ca, Mg and SO₄.....</i>	<i>38</i>
<i>Table 2: Comparison of 1971 and 1991 sampling sets by means of Wilcoxon sign test (57 sampled sites) at Springbok Flats. Except for EC, Na and Cl the changes are statistically significant.</i>	<i>39</i>
<i>Table 3: Comparison of 1971 and 1991 sampling sets by means of Wilcoxon rank test (57 sampled sites) at Springbok Flats. All parameters except for Na show significant changes.....</i>	<i>39</i>

Table 4: Comparison of 1971 and 1991 sampling sets by means of Mann-Whitney test (57 sampled sites) at Springbok Flats. Except for EC, Mg, Na, Cl and Nox-N the changes are statistically significant.40

Table 5: Comparison of 1971 and 1991 sampling sets by means of Kolmogorov-Smirnov test (57 sampled sites) at Springbok Flats. TDS, pH, Ca, TAL and SO4 changes are statistically significant.40
