

LIST OF TABLES

Table 1: Information pertaining to 20 water temperature time series in 4 river systems	12
Table 2: Water temperature classes used to reclassify simulated daily maximum water temperatures	14
Table 3: Results of multiple linear regression models based on correlations between maximum daily water temperatures, and flow, relative humidity, and mean, maximum and minimum daily air temperatures	35
Table 4: Correlation coefficients for 12 water temperature statistics for 20 sites in four river systems in South Africa	37
Table 5: Eigenvectors for principal components analysis of water temperatures (20 sites, 12 variables).	38
Table 6a: Water quality model principles	45
Table 6b: Equivalent water temperature proposed principles	46
