PREFACE	i
EXECUTIVE SUMMARY	iii
ACKNOWLEDGEMENTS	ix
TABLE OF CONTENTS	xi
ACRONYMS	xiv
LIST OF TABLES	xv
LIST OF FIGURES	xvi
CHAPTER 1: INTRODUCTION	1
1.1 Background	1
1.2 Water strategies in South Africa	3
1.2.1 Policy and legislative framework	3
1.2.2 Equity of access and the free basic water policy	5
1.2.3 Devolution to local government	6
1.2.4 Analysis and ongoing issues	7
1.2.4.1 Political context	7
1.2.4.2 Institutional capacity	7
1.2.4.3 Operational sustainability of the recently constructed water surfaces	8
1.2.4.4 Financial sustainability of the free basic water policy	8
1.2.4.5 DWAF's changing role	9
1.2.4.6 Private sectors participation	9
1.3 Sanitation strategies in South Africa	9
1.3.1 Slow progress on sanitation	10
1.3.2 Sanitation considerations	10
1.3.3 Economic considerations	11
1.3.4 Technicalities in sanitation provision	11
1.4 Home Based Care (HBC) strategies in South Africa	12
1.4.1 Understanding HBC	13
1.4.2 Basic need of HBC	14
1.5 Conclusion: Linking water, sanitation and hygiene to health	15
CHAPTER 2: STUDY CONCEPT	17
2.1 Location of the study communities	17
2.1.1 Rural clusters	17
2.1.2 Peri-urban clusters	18
2.2 Field studies	19
2.2.1 Interviews	19
2.2.1.1 Household interviews	19
2.2.1.2 Community interviews	19
2.2.1.3 FBC interviews	19
2.2.1.4 Water and sanitation stakeholder interviews	19
2.2.1.5 NGO interviews	20
2.2.1.6 HBC caregiver interviews	20
2.2.2 Environmental surveys	20
2.2.3 Group discussions	20
2.3 Data analysis	21
CHAPTER 3: HOUSEHOLD DEMOGRAPHICS	22
3.1 Household structures	22
3.1.1 Rural households	22
3.1.2 Peri-urban households	23
3.2 Energy sources of study population	24
3.3 Age and gender distribution	25

3.3.1	Age and gender distribution of study population	25
3.3.2	Age and gender distribution of people living with HIV and AIDS	27
3.4	HIV/AIDS status of study cohort and HBC support	27
3.4.1	Rural areas	27
3.4.2	Peri-urban areas	28
3.5	General health problems in study population	30
3.6	Educational level of study population	31
3.6.1	Rural households	31
3.6.2	Peri-urban households	31
3.7	Household income level	33
3.7.1	Rural households	33
3.7.2	Peri-urban households	34
3.8	Summary and recommendations on study population demographics	37
 CHAPTER 4: WATER SERVICES		 39
4.1	Water services overview	39
4.1.1	The systems	39
4.1.2	Maintenance of water systems	39
4.1.3	Payment for water services by households	40
4.1.4	Time of draught	40
4.1.5	Water availability	41
4.1.6	Water accessibility	42
4.1.7	Water hygiene and container maintenance	44
4.1.7.1	Water storage	44
4.1.7.2	Condition of the water storage containers	46
4.2	Water usage and treatment	49
4.3	Summary and recommendations on water services	51
 CHAPTER 5: SANITATION SERVICES		 55
5.1	Sanitation services overview	55
5.1.1	The systems	55
5.1.1.1	Sanitation systems present in study area	55
5.1.1.2	Details on sanitation systems in study area	57
5.1.1.2.1	VIP toilets	57
5.1.1.2.2	Substandard toilets	57
5.1.1.2.3	Corrugated iron toilet structures	58
5.1.1.2.4	Flush toilets	59
5.1.2	Hygienic conditions of toilets	62
5.1.3	Placement of sanitation structures	63
5.1.4	Support for sanitation infrastructures	63
5.2	Summary and recommendations on sanitation services	63
 CHAPTER 6: HYGIENE SERVICES		 66
6.1	Personal hygiene – hand washing	66
6.1.1	Rural areas	66
6.1.2	Peri-urban areas	66
6.2	Domestic and food hygiene	67
6.3	Waste disposal	68
6.4	Animals	69
6.5	Summary and recommendations on hygiene services	70
 CHAPTER 7: HOME BASED CARE SERVICES		 72
7.1	Linking to health services	72
7.2	HBC support structures	73
7.2.1	Human resources	73
7.2.2	Administration and infrastructure	74

7.2.3	Training	75
7.2.4	Materials and equipment	75
7.2.5	Transport	77
7.2.6	Remuneration	77
7.3	Involvement of the community and other organisations in HBC	77
7.3.1	Community leaders involvement	77
7.3.2	Community members involvement	78
7.3.3	Local government involvement	78
7.3.4	NGO's involvement	79
7.3.5	Faith based care involvement	79
7.3.6	Traditional healers' involvement	80
7.4	Treatment and provision of home based care	81
7.4.1	Concept of HBC according to HBC caregivers	81
7.4.2	The effect of HIV and AIDS status on HBC	81
7.4.3	Benefit of HBC to patients	82
7.4.4	Basic care provided to patients by HBC groups	82
7.4.5	Home based care/treatment by church	83
7.4.6	Home based care/treatment by traditional healers	83
7.4.7	Home based care/treatment by family members	84
7.5	Summary and recommendations on Home Based Care services	84
 CHAPTER 8: CONCLUDING ASSESSMENTS OF WATER, HYGIENE, SANITATION AND HOME BASED CARE INFRASTRUCTURES		 87
 CHAPTER 9: REFERENCES		 94
 ATTACHED CD: APPENDIX A - Household, water supply and sanitation line drawings and photographs
