

TABLE OF CONTENTS

| | |
|---|-------------|
| GROUNDWATER RESEARCH NEEDS IN THE EASTERN CAPE PROVINCE | IV |
| ACKNOWLEDGEMENTS | VI |
| TABLE OF CONTENTS | VII |
| LIST OF FIGURES | VIII |
| LIST OF PLATES | IX |
| GLOSSARY | X |
| 1. INTRODUCTION | I |
| 2. THE KAROO GEOLOGICAL BASIN | 2 |
| 3. THE WATER SUPPLY PROBLEM IN THE EASTERN CAPE PROVINCE | 5 |
| 3.1 Preamble | 5 |
| 3.2 Water Supply in the Eastern Cape | 6 |
| 3.3 The Advantages of Groundwater for Rural Water Supply | 7 |
| 3.4 The Need for Groundwater Research | 7 |
| 3.5 The Study Area | 8 |
| 4. REVIEW OF DEVELOPMENT PLANS FOR WATER IN THE EASTERN CAPE PROVINCE | 10 |
| 4.1 Introduction | 10 |
| 4.2 National Level: The National Water Resources Strategy (NWRS) | 11 |
| 4.3 Provincial Level: The Provincial Growth and Development Plan | 11 |
| 4.4 Water Management Area (WMA) Level: Internal Strategic Perspectives (ISPs) | 12 |
| 4.4.1 Introduction to ISPs | 12 |
| 4.4.2 Importance of Groundwater | 12 |
| 4.4.3 Need for Groundwater Research | 13 |
| 4.4.4 Environmental Importance of Groundwater | 13 |
| 4.5 Municipal Level: Integrated Development Plans (IDPs) and Water Services Development Plans (WSDPs) | 14 |
| 4.6 Key Conclusions from Planning Documents and Research Needs | 15 |
| 5. PREVIOUS GEOHYDROLOGICAL RESEARCH AND REGIONAL STUDIES | 17 |
| 5.1 Key Research Needs based on Past Studies of Karoo Aquifers | 24 |
| 6. FUTURE WATER REQUIREMENTS IN AREAS OF HIGH GROUNDWATER EXPLORATION POTENTIAL | 25 |
| 7. CURRENT GROUNDWATER PROJECTS | 30 |
| 8. FUTURE GROUNDWATER RESEARCH IN THE EASTERN KAROO BASIN | 31 |
| 8.1 Primary Research Needs | 32 |
| 8.1.1 Groundwater Exploration: Geological controls on groundwater potential | 32 |

| | | |
|------------|--|-----------|
| 8.1.2 | Sustainability and environmental impact: Environmental and anthropogenic controls on groundwater development | 37 |
| 8.2 | <i>Support projects</i> | 38 |
| 8.2.1 | Borehole and groundwater information (data capture and analysis) | 38 |
| 8.2.2 | Knowledge transfer | 39 |
| 9. | AFTERWORD | 40 |
| 10. | REFERENCES | 41 |

LIST OF FIGURES

| | | |
|------------|---|----|
| Figure 1: | The Study Area (WMA 12) in the Eastern Cape showing the District Municipalities | 3 |
| Figure 2: | Geology of Water Management Area 12 in the Main Karoo Basin | 4 |
| Figure 3: | Eastern Cape Province population distribution by District Municipality | 5 |
| Figure 4: | Human Development Indices by Municipality in the Eastern Cape (source PGDP) | 6 |
| Figure 5: | District Municipalities of the Eastern Cape Province showing extent of the Main Karoo Geological Basin and Water Management Areas | 8 |
| Figure 6: | Physiography of the Study Area | 9 |
| Figure 7: | Levels of water resources and services planning in South Africa | 10 |
| Figure 8: | Relationship between District and Local Municipal IDPs and WSDPs | 14 |
| Figure 9: | Karoo dolerite dykes, sills and ring-complexes in WMA 12 | 18 |
| Figure 10: | Landsat satellite image of dolerite ring and sill complexes in the Queenstown area | 22 |
| Figure 11: | Schematic Hydro-morphotectonic Model of a Dolerite Sill and Ring Complex | 23 |
| Figure 12: | Groundwater Potential of Water Management Area 12 | 25 |
| Figure 13: | Annual Water Supply Shortfall below RDP Standards per Settlement versus Groundwater Exploration Potential for WMA 12 | 27 |
| Figure 14: | Suitability rating for the development of deeper-seated groundwater in WMA 12 | 28 |
| Figure 15: | Mean groundwater exploration potential versus number of people per Quaternary Catchment with below RDP water supplies | 29 |
