| Acknowledgments   |   |    |  |
| Execut            | ive Summary   | xv |  |
| 1                 | Introduction  | 1  |  |
| 1.1               | Rationale   | 1  |  |
| 1.2               | Objectives  | 2  |  |
| 1.3               | Layout of this report   | 2  |  |
| 2                 | Local scour in rivers   | 4  |  |
| 2.1               | Introduction  | 4  |  |
| 2.2               | The characteristics of local scour                                  | 5  |  |
| 2.3               | Local scour around a cylindrical pier                               | 6  |  |
| 2.4               | Local scour around a vertical plate abutment                        | 10 |  |
| 2.5               | Concluding remarks  | 13 |  |
| 3                 | Bridge scour damage in South Africa                                 | 14 |  |
| 3.1               | Introduction  | 14 |  |
| 3.2               | Historical overview   | 14 |  |
|                   | 3.2.1 Recurrence of large floods and associated scour damage        | 14 |  |
|                   | 3.2.2 Consequences of scour damage                                  | 16 |  |
|                   | 3.2.3 Importance of scour as a failure mechanism in river crossings | 17 |  |
| 3.3               | Methodology adopted by this study                                   | 18 |  |
|                   | 3.3.1 Sources of information  | 18 |  |
|                   | 3.3.2 Field survey  | 20 |  |
|                   | 3.3.3 Identification of most prevalent scour type                   | 22 |  |
|                   | 3.3.4 Costs of repairing scour damage                               | 22 |  |
| 3.4               | Types of scour observed   | 25 |  |
|                   | 3.4.1 General scour   | 25 |  |

|     | 3.4.2 Constriction scour   | 25 |
|-----|--|----|
|     | 3.4.3 Local scour  | 35 |
|     | 3.4.4 Outflanking  | 36 |
|     | 3.4.5 Predominant scouring mechanisms  | 36 |
|     | 3.4.6 Severity of different types of scour                                   | 36 |
| 3.5 | Financial costs of scour damage  | 37 |
|     | 3.5.1 Annual costs of scour damage   | 37 |
|     | 3.5.2 Contribution of extreme historical floods to annual scour damage costs | 37 |
| 3.6 | Concluding remarks   | 37 |
| 4   | Numerical methods for the determination of local scour                       | 40 |
| 4.1 | Introduction   | 40 |
| 4.2 | Overview of the main numerical solution techniques                           | 40 |
|     | 4.2.1 Finite Difference methods  | 41 |
|     | 4.2.2 Finite Volume methods  | 41 |
|     | 4.2.3 Finite Element methods   | 41 |
|     | 4.2.4 Spectral methods   | 42 |
|     | 4.2.5 Discussion   | 42 |
| 4.3 | Fundamental equations used in CFD  | 42 |
|     | 4.3.1 Mass conservation equation   | 43 |
|     | 4.3.2 Momentum and Navier-Stokes equations                                   | 44 |
|     | 4.3.3 Energy equation  | 45 |
|     | 4.3.4 Transport of a scalar quantity   | 46 |
|     | 4.3.5 Van Rijn sediment transport equations                                  | 47 |
| 4.4 | Domain description and boundary conditions                                   | 48 |
|     | 4.4.1 Domain description   | 48 |
|     | 4.4.2 Boundary conditions  | 49 |
| 4.5 | Turbulence and free surface modelling  | 50 |
|     | 4.5.1 Turbulence modelling   | 50 |
|     | 4.5.2 Free surface models  | 53 |
| 4.6 | Previous work in the modelling of local scour                                | 54 |
|     | 4.6.1 Computational modelling of local scour around a pier                   | 54 |
|     | 4.6.2 Computational modelling of local scour around an abutment              | 59 |
| 4.7 | A comparison of CFD codes in current use                                     | 62 |
|     | 4.7.1 Numerical modelling of local scour using FLUENT Version 6.2            | 63 |
|     | 4.7.2 Numerical modelling of local scour using TELEMAC Version 5.4           | 71 |
| 4.8 | Concluding remarks   | 77 |
|     |  |    |

| 5   | Conclusions and recommendations for future research | 78 |
|-----|---|----|
| 5.1 | Conclusions   | 78 |
|     | 5.1.1 Introduction                                  | 78 |
|     | 5.1.2 The extent of the problem in South Africa     | 79 |
|     | 5.1.3 The state of the art of numerical modelling   | 79 |
| 5.2 | Recommendations for future research                 | 81 |
