

TABLE OF CONTENTS

EXECUTIVE SUMMARY	iii
ACKNOWLEDGEMENTS	ix
TABLE OF CONTENTS	x
LIST OF TABLES	xii
LIST OF FIGURES	xiii
LIST OF ABBREVIATIONS	xv
GLOSSARY	xvii
CHAPTER 1 INTRODUCTION	1
1.1 PROJECT AIMS	2
1.2 POTENTIAL APPLICATION OF THE ABR TO PERI-URBAN SANITATION	2
1.3 PROJECT APPROACH	3
CHAPTER 2 LITERATURE REVIEW	5
2.1 ANAEROBIC DIGESTION	5
2.1.1 Anaerobic Microbiology	6
2.2 THE ANAEROBIC BAFFLED REACTOR	8
2.2.1 Design of the ABR	8
2.2.2 Advantages of the ABR	9
2.2.3 Literature Review of the ABR	9
2.3 DYE WASTEWATERS	12
2.3.1 Dye Chemistry	12
2.3.2 Discharge Standards and Treatment Options	13
2.3.3 Food Dyes	14
2.3.4 Textile Dyes	14
2.4 HYDRODYNAMICS	14
2.4.1 Tracers	15
2.4.2 Residence Time Distribution Test	16
2.4.3 Residence Time Distribution Modelling	16
2.4.4 Hydrodynamics of the ABR	17
2.5 MICROBIAL POPULATION CHARACTERISATION	17
2.5.1 16S rRNA Probes	18
2.5.2 Fluorescent In Situ Hybridisation (FISH)	19
2.5.3 Other Molecular Techniques	20
2.5.4 Population Dynamics in the ABR	20
CHAPTER 3 LABORATORY SCREENING TESTS	21
3.1 FOOD DYES	21
3.1.1 Materials and Methods	22
3.1.2 Results and Discussion	25
3.1.3 Conclusions	33
3.2 TEXTILE DYES	34

3.2.1	Anaerobic Toxicity Assays	34
3.2.2	Biodegradability Assays	38
3.3	BREWERY EFFLUENT	42
3.3.1	Results and Discussion	42
CHAPTER 4 LABORATORY-SCALE ABR		44
4.1	TARTRAZINE DEGRADATION	44
4.1.1	Physical Decolourisation	45
4.1.2	Experimental Design	47
4.1.3	Analytical Methods	48
4.1.4	Fluorescent In Situ Hybridisation	48
4.1.5	Results and Discussion	49
4.1.6	Conclusions	54
4.2	DEGRADATION OF AN INDUSTRIAL DYE WASTEWATER	54
4.2.1	Experimental Design	55
4.2.2	Analytical Methods	56
4.2.3	Fluorescent In Situ Hybridisation	56
4.2.4	Results and Discussion	56
4.2.5	Conclusions	64
4.3	DEGRADATION OF A TEXTILE DYE (CI RED 141)	65
4.3.1	Treatment in the Anaerobic Baffled Reactor	65
4.3.2	Reactor pH	66
4.3.3	Reactor Solids	67
4.3.4	Reactor Chemical Oxygen Demand	67
4.3.5	Reactor Colour	69
4.3.6	Reactor Volatile Fatty Acids	71
4.3.7	Population Characterisation	72
4.3.8	Conclusions	77
CHAPTER 5 PILOT PLANT DESIGN AND PERFORMANCE		79
5.1	COMPUTATIONAL FLUID DYNAMICS	79
5.1.1	Baffle Spacing	79
5.1.2	Slot Width	81
5.2	SUMMARY OF RESULTS FROM THE UMBILO WWTP PILOT PLANT STUDY	82
CHAPTER 6 CONCLUSIONS AND RECOMMENDATIONS		84
6.1	LABORATORY SCREENING TESTS	84
6.2	LABORATORY-SCALE ANAEROBIC BAFFLED REACTORS	84
6.2.1	Tartrazine Food Dye	84
6.2.2	Food Dye Manufacturing Effluent	85
6.2.3	CI Reactive Red 141	85
6.2.4	Comparison of an ABR with a Fully-Mixed Reactor	86
6.3	PILOT SCALE ABR	86
6.4	RECOMMENDATIONS	86
