

TABLE OF CONTENTS

EXECUTIVE SUMMARY.....	III
ACKNOWLEDGEMENTS	XIII
TABLE OF CONTENTS	XIV
LIST OF FIGURES.....	XVII
LIST OF TABLES.....	XXIII

CHAPTER 1 BACKGROUND INFORMATION AND LITERATURE REVIEW 1

1.1 Literature review.....	1
1.1.1 Background information.....	1
1.1.2 The problem – effluent characteristics and the potential problems associated with constructed wetlands.....	3
1.1.3 Mathematical modelling of constructed wetlands	5
1.1.4 Wetlands Biology – botanical and microbiological	8
1.2 Objectives of the project.....	9
1.3 References	10

CHAPTER 2 SAMPLING AND MONITORING OF CHEMICAL COMPOSITION IN WETLANDS OVER TWO SEASONS 12

2.1 Introduction.....	12
2.2 Analytical methods for effluent characterisation.....	12
2.3 Sampling methods	13
2.4 Results.....	13
2.4.1 Effluent composition	13
2.4.2 Critical parameter assessment	16
2.4.3 Composition over time for wineries and trends observed for various components ..	16
2.5 Conclusions on methods and trends observed from the data obtained.....	26
2.6 References	26

CHAPTER 3 MODELLING OF CHEMICAL REMOVAL PROCESSES IN WETLANDS..... 28

3.1 Introduction.....	28
3.2 Model development.....	28
3.2.1 Determination of hydraulic parameters.....	30
3.2.2 Residence time distribution.....	35
3.2.3 K-value determination	35
3.3 Testing of the model	38
3.4 Generalisation of model.....	40
3.5 Conclusions	41
3.6 References	44

CHAPTER 4 GENERAL SURVEY OF BOTANICAL FEATURES OF A WINERY WETLAND46

4.1 Introduction.....	46
4.2 Methods	46
4.3 Results.....	47
4.3.1 Plant distribution.....	47
4.4 Discussion – implications for wetland design	47
4.5 Conclusions	49
4.6 References	50

CHAPTER 5 INVESTIGATION OF BIOCHEMICAL ACTIVITY DETECTION IN WETLANDS 51

5.1	Introduction	51
5.2	Methods	52
5.2.1	Methods for sampling, sample preparation and culture	52
5.2.2	Methods of enzyme activity measurement.....	54
5.3	Results of measurements over two seasons	55
5.3.1	Laccase	56
5.3.2	Alcohol dehydrogenase	60
5.3.3	Esterase	63
5.3.4	Glucose-6-phosphate dehydrogenase.....	65
5.3.5	Peroxidase	68
5.3.6	Tyrosinase.....	68
5.3.7	Glucose oxidase.....	69
5.3.8	Catechol 1,2-dioxygenase and catechol 2,3-dioxygenase	69
5.4	Conclusions	71
5.4.1	Trends observed	71
5.4.2	Correlation with chemical and microbial data	72
5.4.3	Key findings and recommendations for further research	73
5.5	References	73

CHAPTER 6 INVESTIGATION OF TRENDS IN MICROBIAL POPULATIONS IN WETLANDS 78

6.1	Introduction	78
6.2	Methods	79
6.2.1	Sampling site and sample collection	79
6.2.2	DNA extraction from soil samples and purification	82
6.2.3	Polymerase chain reaction (PCR)	82
6.2.4	Cloning of PCR-amplified DNA fragments into <i>Escherichia coli</i>	83
6.2.5	Amplified rDNA restriction analysis (ARDRA)	84
6.2.6	Denaturing gradient gel electrophoresis (DGGE)	84
6.2.7	Nucleotide sequence determination and analysis.....	84
6.3	Results	84
6.3.1	DNA extraction and purification from wetland soil samples	84
6.3.2	Construction of a "mini" 16S rDNA clone library	85
6.3.3	Identification of key microorganisms of the methanotrophic consortium in the winery wetland soil	89
6.3.4	Comparative bacterial phylogenetics from 16S rDNA libraries	96
6.3.5	Microbial diversity and (micro-) heterogeneity in the wetland soil	100
6.3.6	Temporal changes in wetland soil community composition	103
6.3.7	Overview of trophic interactions in the winery wetland	114
6.4	Conclusions and trends observed	114
6.5	References	115

CHAPTER 7 INTEGRATION OF RESULTS FOR DESIGN OF WETLANDS EFFECTIVE IN TREATING WINERY WASTEWATER..... 120

7.1	Correlation of chemical, biochemical and microbial information	120
7.2	Conclusions on relationships between chemical, biochemical and microbial data and implications for wetland design	124

CHAPTER 8 CONCLUSIONS AND RECOMMENDATIONS	125
8.1 Key findings	125
8.2 Results arising from phylogenetics studies.....	126
8.3 Recommendations for further research.....	126
APPENDIX 1 COD CALCULATIONS.....	128
APPENDIX 2 AGE DISTRIBUTION GRAPHS AND DATA TABLES.....	129
APPENDIX 3 DECAY CURVES FOR RTD TAIL ESTIMATION.....	149
APPENDIX 4 DERIVATION OF EQUATION OF THE GENERAL MODEL.....	154
