

## TABLE OF CONTENTS

		<u>Page</u>
1	INTRODUCTION	1
2	PROCESS RESUMÉ	2
2.1	Definition	2
2.2	Major steps in the production of carbonated soft drinks	2
2.2.1	Water treatment	2
2.2.2	Simple and final syrup mix	2
2.2.3	Carbonating, blending and filling	4
2.2.4	Crowning and packaging	5
2.2.5	Bottle-washing	5
2.3	Major steps in the production of non-carbonated soft drinks	5
2.3.1	Blending	7
2.3.2	Pasteurising	7
2.3.3	Filling/packing	8
3	SUMMARY OF SURVEY RESULTS	9
3.1	Water intake	9
3.2	Breakdown of water use	10
3.3	Effluent	11
3.4	Breakdown of pollution load	12
4	CONCLUSIONS AND RECOMMENDATIONS	14
4.1	Water intake	14
4.1.1	Equipment selection	14
4.1.2	Equipment utilisation and modification	14
4.1.3	Water saving and reclamation techniques	15
4.1.4	Water monitoring and surveys	16
4.1.5	Implementing a system	16
4.2	Effluent	16
4.2.1	Reducing pollution load	17
4.3	Effluent treatment	18
4.3.1	Solid removal	18
4.3.2	Balancing or segregation	18
4.3.3	pH control	19
4.3.4	Biological treatment	19
4.3.5	Emergency process liquor discharge/bulk dumping of process liquors	19
5	REFERENCES	20

## LIST OF ILLUSTRATIONS

### TABLES

		<u>PAGE</u>
1	Specific water intake of soft drink factories.	9
2	Summary of effluent chemical analyses results.	11
3	Typical final effluent SPL's - with bottle-washing.	12
4	Typical final effluent SPL's - no bottle-washing.	12
5	Breakdown of specific pollution load within a typical bottling plant - with bottle washer.	13
6	Breakdown of specific pollution load within a typical bottling plant - with no bottle-washer.	13
7	Sources of contaminants in a typical soft drink plant.	16

### FIGURES

		<u>PAGE</u>
1	Typical process flow diagram illustrating the manufacture of carbonated soft drinks.	3
2	Typical flow chart for water treatment.	4
3	Simplified diagram of a bottle-washer showing the flow of water and bottles.	6
4	Typical process flow diagram illustrating the manufacture of non-carbonated soft drinks.	8
5	Plan view of typical flume.	17
