

TABLE OF CONTENTS

		Page
1	INTRODUCTION	1
2	PROCESS RÉSUMÉ	2
2.1	The major steps in the production of pasteurized milk	2
2.1.1	Raw milk reception	2
2.1.2	Pasteurization	2
2.1.3	Standardization	4
2.1.4	De-aeration	4
2.1.5	Homogenization	4
2.1.6	Cooling and packing	4
2.2	The major steps in the production of powder products	4
2.2.1	Evaporation	5
2.2.2	Spray drying	5
2.3	The major steps in the production of butter	5
2.3.1	Raw materials	5
2.3.2	Churning	5
2.4	The major steps in the production of ice-cream	9
2.4.1	Raw materials	9
2.4.2	Mixing/freezing	9
2.5	The major steps in the production of cheese	9
2.5.1	Curd manufacturing	9
2.5.2	Finishing	9
2.6	The major steps in the production of condensed milk	11
2.7	The major steps in the production of other milk products	11

2.7.1	Steeping	11
2.7.2	Mixing	15
2.7.3	Pasteurization	15
2.7.4	Incubation	15
2.7.5	Cooking	15
2.7.6	Pre-sterilization	15
2.7.7	Filling and sterilization	15
2.7.8	Chilling	16
2.7.9	Ultra-high temperature (UHT)	16
2.8	Process effluents	16
2.8.1	Milk powder effluents	16
2.8.2	Butter effluents	16
2.8.3	Cheese effluents	16
2.8.4	Effluents from associated processes	17
2.8.4.1	Cleaning-in-place	17
2.8.4.2	Bottle and crate washing	17
2.8.4.3	Carton filling	18
2.8.4.4	Vehicle washing	18
3	SUMMARY OF SURVEY RESULTS	18
3.1	Water intake	18
3.2	Effluent	21
3.3	Breakdown of effluent sources	22
3.3.1	Wastage of milk and milk products	23
3.3.2	Cleaning-in-place	23
3.3.3	Bottle and crate washing	24
3.3.4	Vehicle washing	24
3.3.5	Cheese washing and whey production	24
3.4	Effluent parameter ratios	25

3.5	Solid waste	26
4	CONCLUSIONS AND RECOMMENDATIONS	26
4.1	Water intake	26
4.2	Potential methods of reducing water intake	27
4.3	Effluent production	30
4.4	Phosphate levels in dairy effluent	31
4.5	Potential methods of effluent volume and load reduction	31
4.6	Effluent treatment	34
4.7	Potential research	35
5	REFERENCES	36

LIST OF TABLES

TABLE	TITLE	Page
1	Summary of specific water intakes and specific water usages	(v)
2	Water intake : Raw milk ratios for dairies in South Africa	18
3	Product based water usage for pasteurized milk dairies	19
4	Specific water intake for milk in different packages	20
5	Specific water usages for various dairy products	20
6	Specific water intake for various dairy products	20
7	Specific water intakes for associated processes	21
8	Typical total effluent loads for dairies in South Africa	22
9	Examples of chemical oxygen demand values for various dairy products compared with domestic sewage	23
10	Effluent parameter ratios	25
11	Proposed specific water intake targets for the dairy industry	27

LIST OF FLOW DIAGRAMS

FIGURE	TITLE	Page
1	Process flow diagram for the production of pasteurized full cream milk, pasteurized skim milk and cream	3
2	Process flow diagram for the production of full cream and skim milk powder	6
3	Process flow diagram for the production of whey powder	7
4	Process flow diagram for the production of butter	8
5	Process flow diagram for the production of ice-cream	10
6	Process flow diagram for the production of cheese	12
7	Process flow diagram for the production of evaporated milk and unsweetened condensed milk	13
8	Process flow diagrams for the production of drinking yoghurt, sterimilk, ultra-high temperature products and dairy fruit juices	14
