

LIST OF TABLES

Page

Part 1

Table 1:	Gross chemical composition of different algae 10 (% of dry matter) ¹³³	10
Table 2:	Effect of processing on biological value (BV), digestibility coefficient (DC), and net protein utilization (NPU) of <i>Scenedesmus</i> , <i>Spirulina</i>	11
Table 3:	Comparable data on biological value (BV), digestibility coefficient (DC), and net protein utilization (NPU) of different algae ¹³³	12

Part 2

Table 1:	Summary of environmental conditions prevailing during the months for which algae compositional data are available.	32
Table 2:	Gross chemical composition of the <i>Microcystis</i> scum samples collected during the period August 1984 to May 1987.	33
Table 3:	Variation in the amino acid composition of <i>Microcystis</i> samples collected from Hartbeespoort Dam during the period August 1984 to May 1987	34
Table 4:	Amino acid pattern of selected algae including <i>Microcystis</i> scum (g(16gN) ⁻¹)	35
Table 5:	Results of the stepwise regression analyses with β -carotene and α -tocopherol as dependant variables and temperature, chlorophyll <i>a</i> and N/P-ratio as the independent variables	36
Table 6:	The effects of processing on various constituents of microalgae. (Sources: Becker, 1984; Becker & Venkatamaran, 1984)	37
Table 7:	Estimates of the value of various fine chemicals from microalgae (Values from the literature in Australian Dollars, US Dollars or Rand) (Source: A Jarvis, SASTECH)	38
Table 8:	Vitamin B ₁₂ and α -tocopherol (Vit. E) contents of various algae species (μ g (g dry weight) ⁻¹) (Source Borowitzka, 1988)	39
Table 9:	Summary of the range of lipid levels reported in various micro-algae and the distribution of these lipids (on the basis of literature cited in text)	40
Table 10:	Effect of some environmental factors on lipid (% of dry weight) of a range of micro-algae	41

LIST OF TABLES (cont)

	Page
Table 11: Summarized information from the literature on fine chemicals from algae (source: A Jarvis <i>in left</i>)	43
Table 12: Major commercial biotechnology operations using microalgal mass cultures	44
Table 13: Calculation of the daily production value of fine chemicals from <i>Microcystis</i> at the Schoemansville and Kosmos plants	44
