EXECUTIVE SUMMARY		II
ACKNOWLEDGEMENTS		XI
 CHAPTER		
1.	INTRODUCTION	1
1-1	OBJECTIVES OF STUDY	1
1-2	THE NEED FOR A REVISED PROCEDURE	1
1-3	PRACTITIONERS' RELUCTANCE TO ACCEPT CHANGE	2
1-4	DEVELOPMENT OF THE SAPWAT CONCEPT	2
	1-4-1 Approaches evaluated	2
	1-4-2 Programming approach	3
2.	ESTIMATING IRRIGATION REQUIREMENTS - QUO VADIS?	4
2-1	INTRODUCTION	4
2-2	MOTIVATION FOR EXPERT CONSULTATION ON FAO 24	4
2-3	FAO TECHNICAL CONSULTATION PROCEEDINGS	5
2-4	RECOMMENDATIONS AND CONCLUSIONS OF THE FAO CONSULTATION	5
3.	OVERVIEW OF SAPWAT	7
3-1	THE ELEMENTS OF SAPWAT	7
	3-1-1 The 712 climatic zones and ACRU ZONE FINDER	7
	3-1-2 Display of seasonal rainfall data	7
	3-1-3 Crop coefficients	7
	3-1-4 Monthly irrigation requirements	7
	3-1-5 Pre-programmed irrigation	8
	3-1-6 Manual adjustments	8
	3-1-7 Estimating gross irrigation requirements	8
	3-1-8 Scheme monthly water requirements	8
	3-1-9 Packaging of program	8
4.	THE 712 CLIMATIC ZONES	9
4-1	INTRODUCTION	9
4-2	THE DEMARCATION OF THE ZONES	9
4-3	ACRU ZONE FINDER	10
4-4	EXAMPLE SCREENS	10
5.	DISPLAY OF SEASONAL RAINFALL DATA	13
5-1	PROGRAM RAIN	13
5-2	EXAMPLE SCREENS	13
6.	CROP COEFFICIENTS	17
6-1	INTRODUCTION	17
6-2	MONTHKC	20
6-3	AVAILABILITY AND RELIABILITY OF CROP COEFFICIENTS	20
6-4	EXAMPLE SCREENS AND MENU APPLICATIONS	21
7.	APPLICATION OF THE ACRU MODEL: PMBWAT	23
7-1	INTRODUCTION	23
7-2	PMBWAT	23
7-3	INCORPORATING ACRU OUTPUT IN SAPWAT	24
7-4	EXAMPLE SCREENS	26
8.	PRE-PROGRAMMED IRRIGATION	34
8-1	INTRODUCTION	34
8-2	IRRIGATION AND SOIL WATER	34

	8-2-1	The generally applied approach	34
	8-2-2	The profile available water capacity (PAWC) approach	35
	8-2-3	Progressive depletion of soil water	37
8-3		STANDARD BEWAB AND ITS APPLICATIONS	38
	8-3-1	Example screens: standard BEWAB	38
8-4		EXTENDED BEWAB AND ITS APPLICATIONS	45
	8-4-1	Example screens: extended BEWAB	46
9.		ADJUSTMENTS TO NETT CROP WATER REQUIREMENTS	48
	9-1	INTRODUCTION	48
	9-2	ADVECTION INFLUENCES AND SIZE OF IRRIGATION DEVELOPMENT	48
10.		CROP WATER: YIELD FUNCTIONS	49
	10-1	INTRODUCTION	49
	10-2	CROP WATER FUNCTIONS AS AN AID TO JUDGEMENT	49
11.		SCHEME WATER REQUIREMENTS	51
12.		GROSS IRRIGATION REQUIREMENTS	53
	12-1	INTRODUCTION	53
	12-2	ESTIMATING APPLICATION EFFICIENCY	54
	12-3	FROM NETT TO GROSS	55
		12-3-1 Example outputs and editing	56
	12-4	SPRAY AND RELATED LOSSES	57
	12-5	DISTRIBUTION LOSSES	57
13.		PEAK WATER REQUIREMENTS	59
	13-1	INTRODUCTION	59
	13-2	PRACTICAL EXAMPLES FROM SOUTHERN ORANGE FREE STATE	59
	13-3	MANAGEMENT CONSIDERATIONS	60
14.		NETT WATER SUPPLY LESS THAN ATMOSPHERIC EVAPORATIVE DEMAND	61
	14-1	INTRODUCTION	61
	14-2	THE BASIC PRINCIPLES	61
	14-3	DEFICIT IRRIGATION	62
15.		CROP GROWTH MODELS	63
	15-1	INTRODUCTION	63
	15-2	THE ROLE OF CROP GROWTH MODELS	63
	15-3	APPLYING CROP GROWTH MODELS	64
	15-4	EXAMPLE OF MODEL APPLICATIONS	65
16.		PACKAGING REGIONAL IRRIGATION GUIDELINES	67
	16-1	INTRODUCTION	67
	16-2	GUIDELINE ELEMENTS	68
	16-3	PACKAGING GUIDELINES	69
	16-4	EXAMPLE SCREENS AND MENUS	70
17.		CONCLUSIONS AND RECOMMENDATIONS	74
	17-1	CONCLUSIONS	74
	17-2	RECOMMENDATIONS	74
		17-2-1 Evaluation of SAPWAT	74
		17-2-2 The generation of estimated irrigation requirements by ACRU	75
		17-2-3 The further refinement and development of SAPWAT	76
		17-2-4 Implementation	76
		17-2-5 The "water deficit" situation	76
		17-2-6 Zonal irrigation guidelines	77
