

## TABLE OF CONTENTS

<b>EXECUTIVE SUMMARY</b> .....	i
<b>ACKNOWLEDGEMENTS</b> .....	v
<b>PART ONE : BACKGROUND INFORMATION</b>	
1. INTRODUCTION .....	1
1.1 Project Objectives and Methodology .....	1
1.2 Report Structure .....	2
2. CATCHMENT DESCRIPTIONS .....	2
2.1 La Mercy Catchments .....	2
2.2 Umzinto Catchments .....	7
2.3 Runoff Plots .....	8
3. REVIEW OF PAST RESEARCH .....	13
3.1 Runoff Plots .....	13
3.2 Research Catchments .....	16
3.3 Hydrological Modelling .....	20
<b>PART TWO: SIMULATION OF RUNOFF AND SEDIMENT YIELD FROM CATCHMENTS UNDER SUGARCANE PRODUCTION AT LA MERCY JC Smithers, P Mathews and RE Schulze</b>	
1. INTRODUCTION .....	28
2. DESCRIPTION OF RUNOFF PLOTS AND CATCHMENTS .....	28
3. HYDROLOGICAL DATA BASE .....	28
3.1 Sources of Data .....	28
3.2 Data Problems .....	29
4. ASSESSMENT OF TRENDS AND RELATIONSHIPS .....	31
4.1 Event Rainfall versus Runoff .....	31
4.2 Accumulated Runoff Totals .....	34
4.3 Event Sediment Yield .....	36
4.4 Accumulated Sediment Yield .....	41
5. THE <i>ACRU</i> AGRO-HYDROLOGICAL MODELLING SYSTEM .....	43
5.1 Simulation of Stream Flow Volume .....	43
5.2 Simulation of Peak Discharge .....	44
5.3 Simulation of Hydrograph Shape .....	44
5.4 Simulation of Sediment Yield .....	44

6.	MODEL APPLICATION AND PERFORMANCE	45
6.1	Simulation of Runoff Volume	45
6.2	Simulation of Daily Peak Discharge	77
6.3	Hydrograph simulation	86
6.4	Simulation of Sediment Yield	96
7.	DISCUSSION AND CONCLUSIONS	105
8.	LOCATION OF FILES	108
8.1	<i>ACRU</i> Climate Files for La Mercy Catchments	108
8.2	<i>ACRU</i> Menu Files	108
8.3	Location of Spreadsheets	109

**PART THREE: MODELLING THE IMPACTS OF GRASSLAND, FORESTRY AND SUGARCANE ON CATCHMENT RUNOFF AT THE UMZINTO RESEARCH CATCHMENTS**  
**JC Smithers and RE Schulze**

1.	INTRODUCTION	115
2.	THE <i>ACRU</i> AGROHYDROLOGICAL SIMULATION MODEL	115
3.	METHODOLOGY AND MODEL INPUT	116
3.1	Soils Information	116
3.2	Land Cover Information	118
3.3	Climate Data	119
4.	STOCHASTIC VS OBSERVED RAINFALL VALUES	121
5.	SCENARIO 1: SIMULATIONS USING SHALLOW SOILS	123
5.1	Catchment 1	123
5.2	Catchment 2	126
5.3	Catchment 6	128
5.4	Discussion of Results from SCENARIO 1	130
6.	SCENARIO 2 : SIMULATIONS USING ACTUAL SOIL DEPTHS	130
6.1	Catchment 1	131
6.2	Catchment 2	133
6.3	Catchment 6	135
6.4	Discussion of Results from SCENARIO 2	137
7.	DISCUSSION AND CONCLUSIONS	137
8.	LOCATION OF <i>ACRU</i> INPUT FILES	138

**PART FOUR: CONCLUSIONS AND RECOMMENDATIONS**

1.	CONCLUSIONS .....	140
1.1	Hydrological Trends and Relationships .....	140
1.2	Simulation of Runoff and Sediment Yield at La Mercy .....	141
1.3	Modelling the Impacts of Grassland, Forestry and Sugar Cane at Umzinto .....	143
2.	RECOMMENDATIONS .....	144
2.1	Data Collection .....	144
2.2	ACRU Model Development .....	144
2.3	Other Water Research .....	144

<b>PART FIVE: REFERENCES .....</b>	<b>146</b>
