EXECUTIVE SUMMARY	i
ACKNOWLEDGEMENTS	iv
TABLE OF CONTENTS	v
LIST OF FIGURES	vii
LIST OF TABLES	viii
LIST OF ABBREVIATIONS	ix
1. INTRODUCTION	1
1.1 Industry Background	1
1.2 Application of vermiculture	1
1.3 Vermiculture in South African abattoirs	2
1.4 The project and its objective.....	2
2. LITERATURE SURVEY	4
2.1 Earthworm anatomy and life-cycle	4
2.2 Choice of earthworm species for biotechnological applications.....	5
2.3 Growth.....	7
2.4 Factors affecting earthworm growth	8
2.4.1 Temperature.....	8
2.4.2 pH.....	9
2.4.3 Oxygen requirements	9
2.4.4 Water relationships/Humidity	10
2.4.5 Light	10
2.4.6 Electrolyte concentration and presence of toxic compounds	10
2.5 Interactions between earthworms and micro-organisms	11
Pathogens and vermicompost.....	12
2.6 Abattoir wastes & wastewater as feeding substrates.....	12
2.6.1 Amounts of waste generated	12
2.6.2 Rumen contents as feed substrate for earthworms	13
2.6.2.1 Ammonia.....	13
2.6.2.2 Fatty acids.....	13
2.6.3 Blood as feed substrate for earthworms	13
2.6.4 The potential influence of wastewater on the earthworm population	14
2.6.5 Presence of cleansers and sterilants in wash water	14
2.7 General considerations	15
3. MATERIALS AND METHODS	16
3.1 Choice and cultivation of suitable earthworms	16
3.2 The influence of temperature.....	17
3.3 Feeding materials and the handling of blood	17
3.3.1 Rumen contents and water	17
3.3.2 Blood	17
3.4 Analytical procedures.....	18

4.	STUDIES WITH STACKED 3-CONTAINER SYSTEMS.....	19
4.1	Experiments in stacked small and medium containers.....	19
4.2	Results	21
4.2.1	Deodorisation of the effluent.....	21
4.2.2	Chemical oxygen demand (COD) values.....	21
4.2.3	Suspended solids (SS)	22
4.2.4	Changes in pH	22
4.2.5	Further observations	23
4.3	Conclusions	24
5.	STUDIES WITH WELL-DRAINING SINGLE CONTAINERS.....	25
5.1	Experiments in medium size and deep containers with filter systems.....	25
5.2	Laboratory scale prototype apparatus.....	27
5.3	Results for COD measurements	27
5.4	Further observations	31
6.	GENERAL RESULTS, CONCLUSIONS AND RECOMMENDATIONS	32
6.1	Results	32
6.2	General conclusions and recommendations	32
7.	BIBLIOGRAPHY	34
	APPENDIX - PILOT-PLANT DESIGN.....	37

LIST OF FIGURES

Figure 4.1	Schematic drawings of stacked 3-container systems	20
Figure 5.1	Bucket with sand filter	26
Figure 5.2	Dustbins fitted with sand filters and different columns	26
Figure 5.3	Schematic drawings of prototype apparatus	28
Figure 5.3	Experiments in prototype apparatus – comparison of COD measurements	30
Figure 6.1	Schematic drawing of pilot-plant - View from the side	38
Figure 6.2	Schematic drawing of pilot-plant - View from the top.....	39
