LIST OF TABLES	(v)
ACKNOWLEDGEMENTS	(vi)
EXECUTIVE SUMMARY	ES.1
1. INTRODUCTION	1
1.1 Background	1
1.2 Aims of study	4
1.3 Approach	5
2. DATA COLLECTION	6
2.1 Introduction	6
2.2 Selection of the validation period	6
2.3 Data collection	8
2.3.1 Meteorological data	10
2.3.2 River flow and water quality data	10
2.4 Final selection of a suitable validation period	20
3. CONSTRUCTION OF DATA BASES	21
3.1 Introduction	21
3.2 Infilling of data	22
3.2.1 Infilling of meteorological data	23
3.2.2 Infilling of inflow water quality data	28
3.3 Data base construction	29
3.3.1 Meteorological data base	30
3.3.2 Inflow data base	30
3.3.3 Input data base	30
4. VALIDATION RESULTS	31
4.1 Introduction	31
4.2 Hydrodynamic validation results	31
4.3 Water quality validation results	34
4.3.1 Chlorophyll-a	34
4.3.2 Ortho-phosphate	37

4.3.3	Ammonia	40
4.3.4	Nitrate	43
4.3.5	TSS	45
4.3.6	Dissolved oxygen	46
4.4	General discussion of water quality simulation results and possible uses of the modified MINLAKE model	48
5.	CONCLUSIONS	52
5.1	Data Bases	52
5.2	Validation of the Hydrodynamic Behaviour of Roodeplaat Dam	53
5.3	Validation of the Water Quality Behaviour of Roodeplaat Dam	53
5.4	Possible Uses of the Modified Minlake Model	54
6.	RECOMMENDATIONS	56
7.	REFERENCES	57

LIST OF FIGURES

No.	Description	Page
1.1	Map of Roodeplaat Dam indicating monitoring points and the rivers flowing into the dam	4
2.1	Time-series graph of surface ortho-phosphate concentration as measured in Roodeplaat Dam near the dam wall for the period October 1980 to September 1994	7
2.2	Time-series graph of surface chlorophyll-a concentration as measured in Roodeplaat Dam near the dam wall for the period October 1980 to September 1994	8
2.3	Time-series graph of flows as measured in Pienaars River, Hartbeesspruit and Edendalespruit	16
2.4	Time-series graph of ortho-phosphate concentrations as measured in Pienaars River, Hartbeesspruit and Edendalespruit	17
2.5	Time-series graph of ammonia concentrations as measured in Pienaars River, Hartbeesspruit and Edendalespruit	18
2.6	Time-series graph of nitrate concentrations as measured in Pienaars River, Hartbeesspruit and Edendalespruit	19

LIST OF FIGURES (continued)

No.	Description	Page
3.1	Flow in Edendalespruit	22
3.2	Observed radiation data for Roodeplaat Dam	27
4.1	Time-series graph of simulated and observed water temperature at a depth of 1 metre in Roodeplaat Dam	32
4.2	Time-series graph of simulated and observed water temperature at a depth of 20 metre in Roodeplaat Dam	32
4.3	Depth profiles of simulated and observed water temperature in Roodeplaat Dam for the period October 1988 to December 1989	33
4.4	Time-series graph of mixing depth in Roodeplaat Dam for the period October 1988 to January 1990	34
4.5	Time-series graph of simulated and observed chlorophyll-a concentrations at a depth of 1 metre in Roodeplaat Dam during the validation period	35
4.6	Duration curves of simulated and observed chlorophyll-a concentrations during the validation period	36
4.7	Duration curves of simulated and observed chlorophyll-a concentrations during the calibration period	36
4.8	Time-series graph of simulated and observed ortho-phosphate concentrations at a depth of 1 metre in Roodeplaat Dam during the validation period	37
4.9	Time-series graph of simulated and observed ortho-phosphate concentrations at a depth of 20 metre in Roodeplaat Dam during the validation period	38
4.10	Duration curves of simulated and observed monthly surface ortho-phosphate concentrations during the validation period	38
4.11	Duration curves of simulated and observed monthly surface ortho-phosphate concentrations during the calibration period	38
4.12	Time-series graph of simulated and observed ammonia concentrations at a depth of 1 metre in Roodeplaat Dam during the validation period	40
4.13	Time-series graph of simulated and observed ammonia concentrations at a depth of 20 metre in Roodeplaat Dam during the validation period	41

LIST OF FIGURES (continued)

No.	Description	Page
4.14	Duration curves of simulated and observed monthly surface ammonia concentrations during the validation period	41
4.15	Duration curves of simulated and observed monthly surface ammonia concentrations during the calibration period	41
4.16	Time-series graph of simulated and observed nitrate concentrations at a depth of 1 metre in Roodeplaat Dam during the validation period	43
4.17	Time-series graph of simulated and observed nitrate concentrations at a depth of 20 metre in Roodeplaat Dam during the validation period	44
4.18	Duration curves of simulated and observed monthly surface nitrate concentrations during the validation period	44
4.19	Duration curves of simulated and observed monthly surface nitrate concentrations during the calibration period	44
4.20	Time-series graph of simulated TSS in Roodeplaat Dam during the validation period	46
4.21	Time-series graph of simulated and observed dissolved oxygen concentrations at a depth of 1 metre in Roodeplaat Dam during the validation period	47
4.22	Time-series graph of simulated and observed dissolved oxygen concentrations at a depth of 20 metre in Roodeplaat Dam during the validation period	47

LIST OF TABLES

No.	Description	Page
2.1	Variables required by the MINLAKE model and the institutions where data were requested	9
2.2	The availability of meteorological data for Roodeplaat Dam	11
2.3	The availability of flow and river water quality data	13
3.1	The availability of inflow water quality data	23
3.2	Infilling of water quality variables for Edendalespruit	28
4.1	Simulated and observed chlorophyll-a concentration percentile values during the validation and calibration periods	36
4.2	Simulated and observed monthly surface ortho-phosphate concentration percentile values during the validation and calibration periods	39
4.3	Simulated and observed monthly surface ammonia concentrations percentile values during the validation and calibration periods	42
4.4	Simulated and observed monthly surface nitrate concentration percentile values during the validation and calibration periods	45
