

TABLE OF CONTENTS

Executive Summary	i
Acknowledgements	v
Table of Contents	vi
1. THE PURPOSE OF THE PROJECT	1
1.1 Background and Motivation	1
1.2 Objectives of the project	2
1.3 Approach to the project	3
2. LITERATURE REVIEW	5
2.1 Introduction	5
2.2 Acid mine drainage (AMD)	6
2.2.1. Sources and problems associated with acid mine drainage	6
2.3 The microbiology in acid mine drainage	8
2.4 Treatment of acid mine drainage	9
2.4.1. Sealing methods	9
2.4.2. Broad-spectrum antimicrobial agents	9
2.4.3. Desalination	10
2.4.4. Biological treatment methods	10
2.5 The microbiology of the sulphur cycle	12
2.5.1. Sulphate reduction	14
2.5.2. Competition between sulphate-reducing bacteria and methanogens	24
3. THE AVAILABILITY OF ALTERNATIVE CARBON SOURCES FOR USE IN PASSIVE TREATMENT SYSTEMS IN SOUTH AFRICA	28
3.1 Definition of a passive treatment system	28
3.2 Intrinsically generated carbon	28
3.3 Incorporation of organic rich substrates into passive treatment systems	31
3.4 Transport costs	33
3.5 Total costs of carbon sources	33
4. CONCEPTUAL MODEL OF THE MICROBIOLOGY OF SULPHATE-REDUCING UNITS (SRUs) IN PASSIVE TREATMENT SYSTEMS	34
4.1. Model types	34
4.2. Objectives	35
4.3. Description of the system	35
4.4. Organism groups present	36
4.4.1. Acidogenics	36
4.4.2. Acetogenic bacteria	37
4.4.3. Hydrogenotrophic methanogens	37
4.4.4. Acetoclast methanogens	37
4.4.5. Heterotrophic sulphidogens	38
4.4.6. Hydrogenotrophic sulphidogens	38

5.	DEVELOPMENT OF A SIMPLE LABORATORY TEST TO DETERMINE THE SUITABILITY OF DIFFERENT CARBON SOURCES FOR SULPHATE REMOVAL FROM MINE WATER IN PASSIVE TREATMENT SYSTEMS	41
5.1	Introduction	41
5.2	Materials and Methods	43
5.2.1	<i>Design of a cost-effective anaerobic bioreactor</i>	44
5.2.2	<i>Media composition</i>	44
5.2.3	<i>Standardisation of the inoculum</i>	45
5.2.4	<i>Chemical analysis for sulphate content</i>	45
5.2.5	<i>Preliminary analysis for sulphate content</i>	45
5.3	Results and discussion	46
5.3.1	<i>Media composition</i>	46
5.3.2	<i>Standardisation of the bioreactor inoculum</i>	46
5.3.3	<i>Preliminary sulphate reduction tests with AMD</i>	47
5.3.4	<i>Suitability of the anaerobic bioreactor for further experiments</i>	49
5.4	Summary	49
6.	EXPERIMENTS ON BIOLOGICAL SULPHATE REDUCTION WITH ARTIFICIAL AMD USING DEFINED CARBON SOURCES	50
6.1	Introduction	50
6.2	Materials and methods used in the experiments	50
6.2.1	<i>Defined carbon sources</i>	50
6.2.2	<i>Inoculum</i>	51
6.3	Control experiments	52
6.3.1	<i>Sampling</i>	52
6.3.2	<i>Chemical analysis</i>	52
6.4	Results	53
6.4.1	<i>Sulphate reduction</i>	53
6.5	Discussion	56
7.	EXPERIMENTS ON BIOLOGICAL SULPHATE REDUCTION WITH ARTIFICIAL AMD USING UNDEFINED CARBON SOURCES	59
7.1	Introduction	59
7.2	Materials and Methods	61
7.2.1	<i>Reactor design</i>	61
7.2.2	<i>Artificial Acid Mine Drainage</i>	61
7.2.3	<i>Undefined carbon sources</i>	61
7.2.4	<i>Inoculum</i>	62
7.2.5	<i>Experimental set-up</i>	62
7.2.6	<i>Sampling</i>	62
7.2.7	<i>Control experiments</i>	62
7.2.8	<i>Chemical analysis</i>	63
7.3	Results	63
7.3.1	<i>Experiment 1</i>	63
7.3.2	<i>Experiment 2</i>	64
7.3.3	<i>Experiment 3</i>	66
7.3.4	<i>Experiment 4</i>	68
7.4	Discussion	70
8.	CONCLUSIONS AND RECOMMENDATIONS FOR FURTHER RESEARCH WORK	72
8.1	Conclusions from the current project	72
8.2	Recommendations for further research work	76
9.	REFERENCES	78
