CHAPTER 1: INTRODUCTION

1.1 Project objectives	1-1
1.2 Background.....	1-2
1.2.1 Transpiration by trees (Phase I).....	1-3
1.2.2 Transpiration by Reeds (Phase I)	1-4
1.3 Definitions	1-4

CHAPTER 2: THE STUDY SITES

2.1 The reed study site.....	2-1
2.2 The tree study site	2-2

CHAPTER 3: METHODS AND MATERIALS

3.1 Bowen ratio energy balance technique.....	3-1
3.1.1 Background and theory	3-1
3.1.2 Bowen ratio instrumentation.....	3-2
3.1.3 Data processing.....	3-4
3.2 Eddy covariance technique	3-4
3.2.1 Introduction	3-4
3.2.2 Theory.....	3-4
3.2.3 Eddy covariance instrumentation.....	3-5
3.3 The use of canopy temperatures to monitor evapotranspiration.....	3-14
3.4 The use of the Penman-Monteith equation in the estimation of actual evapotranspiration.....	3-16
3.4.1 Derivation of the Penman-Monteith equation.....	3-16
3.4.2 The application of the Penman-Monteith equation to canopy specific conditions in the calculation of actual evapotranspiration.....	3-19

CHAPTER 4: RESULTS

4.1 General meteorological conditions during the study period.....	4-1
4.2 Reed evapotranspiration.....	4-1
4.2.1 Energy budget.....	4-1

4.2.2	The annual cycle of evapotranspiration from the reed community.....	4-5
4.3	Tree evapotranspiration.....	4-7
4.3.1	Eddy Correlation technique.....	4-7
4.3.2	Tree evapotranspiration using the Infra-red thermometry technique.....	4-8
4.3.3	The Bowen ratio energy balance technique at the forest site.....	4-8
4.4	Comparison of tree and reed evapotranspiration.....	4-12
4.4.1	Winter.....	4-12
4.4.2	Summer.....	4-13

CHAPTER 5: MODELLING REED AND TREE EVAPOTRANSPIRATION

5.1	Total evapotranspiration comparison as simulated by canopy specific Penman-Monteith equations.....	5-2
5.1.1	Simulation of the net radiation.....	5-2
5.1.2	Calculation of the soil heat flux density (G_s) from the simulated net radiation (R_{ns}).....	5-5
5.1.3	Total canopy specific Penman-Monteith evapotranspiration ..	5-10

CHAPTER 6: LOW FLOW VERIFICATION STUDY

6.1	The Sabie river riparian water balance.....	6-1
6.2	Vegetation analysis.....	6-1
6.2.1	Study site.....	6-1
6.2.2	Method.....	6-1
6.3	River gauging study.....	6-3

CHAPTER 7: DISCUSSION, LINKAGES TO RIVER MANAGEMENT AND CONCLUSIONS

7.1	Discussion.....	7-1
7.2	Linkages to river management.....	7-3
7.3	Conclusions.....	7-6
