

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	2	
LIST OF FIGURES	6	
LIST OF TABLES	11	
LIST OF ABBREVIATIONS	12	
CHAPTER 1	INTRODUCTION	
1.1	Background	13
1.2	Teleconnections between oceans and local rainfall	13
1.2.1	Equatorial Pacific Ocean	14
1.2.2	Indian Ocean	14
1.2.3	Adjacent regional oceans	14
1.2.4	SST as boundary forcing	15
1.3	Climate simulations with numerical models	15
1.3.1	Boundary forcing and initial conditions	15
1.3.2	Probabilistic character of seasonal forecasting	16
1.4	Seasonal forecasting with numerical models	16
1.5	Objectives of the CLIPWATER project	18
1.6	Organisation of the report	18
CHAPTER 2	OBSERVED AND MODEL SIMULATED RAINFALL	
2.1	Introduction	20
2.2	Atmospheric General Circulation Models (AGCMs)	20
2.2.1	CSIRO9 Mark II AGCM (R21 spectral resolution)	20
2.2.2	CSIRO9 Mark II AGCM (T63 spectral resolution)	21
2.3	Observed and Model Simulated Rainfall	21
2.3.1	CSIRO9(R21) AGCM simulated vs observed rainfall	21
2.3.1.1	Average or mean rainfall	21
2.3.1.2	Rainfall median	22
2.3.2	CSIRO9(T63) AGCM simulated vs observed rainfall	23
2.3.2.1	SST data and hindcast simulations	24

2.3.2.2	Observed rainfall data	24
2.3.2.3	Model simulated rainfall climate	26
2.3.2.4	Statistical methods	27
2.3.2.5	Observed and model simulated rainfall (Summer season (October - March))	28
2.3.2.6	Observed and model simulated rainfall (Mid-summer season (December and January))	31
2.3.2.7	Observed and model simulated rainfall (Winter season (May - August))	33
2.3.2.8	Global sea surface temperature correlation Patterns	34
2.3.2.9	Discussion	36
CHAPTER 3	CSIRO9(R21) AGCM RAINFALL PROJECTIONS FROM STATISTICAL SST FORECASTS	
3.1	Introduction	38
3.2	Rainfall regions	39
3.3	Grid averages of rainfall	40
3.4	Sea surface temperature prognoses	40
3.5	Rainfall forecasting procedure	41
3.6	Hindcast simulations and model skill	42
3.7	Rainfall forecasts (1998/1999)	43
	3.7.1 Accumulated rainfall verification	43
	3.7.2 Spatial rainfall verification	45
3.8	Summary	47
CHAPTER 4	COUPLED ATMOSPHERE-OCEAN GENERAL CIRCULATION MODEL CONFIGURATION	
4.1	Introduction	48
4.2	The atmospheric model (AGCM)	48
4.3	The ocean model (OGCM)	48
4.4	Coupling procedure	49
4.5	Use of a "heat flux-SST coupled spin-up" to obtain AGCM wind stress climatology	50
4.6	Forecasting initialisation	50

CHAPTER 5	CSIRO9(R21) AGCM RAINFALL PROJECTIONS FROM CGCM SST FORECASTS	
5.1	Introduction	55
5.2	CGCM SST forecast verification	55
	5.2.1 CGCM SST forecasts against persistence	56
	5.2.2 CGCM and CCA/POPs SST forecast comparisons	57
	5.2.3 Spatial SST correlation patterns	60
5.3	CSIRO9(R21) AGCM rainfall verification	61
	5.3.1 Hindcast simulations	62
	5.3.2 Rainfall category classification	62
	5.3.3 Model skill	63
	5.3.3.1 Percentage of hit rate scores for monthly simulations	64
	5.3.3.2 Percentage of hit rate scores for three-month average (seasonal) simulations	66
5.4	CGCM SST forecasts for the 2001/2002 summer season	68
5.5	Probabilistic rainfall forecasts for 2001/2002	70
5.6	Discussion	70
CHAPTER 6	CONCLUSION	
6.1	Summary of research	74
6.2	Outlook for the future	74
