

TABLE OF CONTENTS

EXECUTIVE SUMMARY	i
ACKNOWLEDGEMENTS	ii
TABLE OF CONTENTS	iii
1. INTRODUCTION	1
1.1 Ozonation.....	1
1.2 Tastes and Odours.....	4
1.3 Enteric Viruses	5
2. OZONE GENERATION TECHNOLOGY	6
2.1 Fundamental Principles	6
2.1.1 Physics of electrical discharges.....	8
2.1.2 Chemistry of electrical discharges	10
2.2 Dielectric Barrier Discharge	12
2.2.1 Volume discharge	12
2.2.2 Surface discharge	13
3. NEW DEVELOPMENT.....	15
3.1 Surface Discharge Realisation and Initial Investigation.....	15
3.1.1 Dielectric layer material selection and application	17
3.1.2 Properties of the high voltage electrode and its construction	20
3.1.3 Effects of air moisture, chemical durability and air flow patterns.....	20
3.2 Power Supply Development	22
3.2.1 Switching topologies.....	23
3.3 Assemblies.....	26
3.3.1 Water cooling vs air cooling.....	27
3.3.2 Air or oxygen operation	29
3.3.3 Small and medium scale ozonators.....	29
3.3.4 Large scale ozonators	31
3.3.5 Modularity and packaging	31
3.3.6 Ozone applications and systems.....	33
3.4 Future Developments	35

4.	REMOVAL OF TASTES AND ODOURS FROM HARTBEESPOORTDAM WATER ..	35
4.1	Strategy	35
4.2	Methodology	36
	4.2.1 Spiking of samples	36
	4.2.2 Batch reactor experimental setup and analysis	36
	4.2.3 Results and discussion	38
5.	OZONE DEMAND	39
5.1	Methodology	39
5.2	Results and Discussion	41
6.	CONCLUSIONS	42
6.1	Ozone Generator Technology	42
6.2	Taste and Odour Removal	42
6.3	Enteric Viruses	43
7.	REFERENCES	44
	APPENDIX 1	47
