INTRODUCTION	1
1.1 Background.....	1
1.2 Objectives	1
1.3 Description of the project	1
LITERATURE REVIEW: FACTORS WHICH INFLUENCE PERFORMANCE	2
2.1 Water Quality.....	2
2.1.1 Physical.....	3
2.1.2 Chemical	4
2.1.3 Biological.....	8
2.1.4 Fertilizers	10
2.1.5 Oils and lubricants	10
2.2 Water treatment methods	10
2.2.1 Chlorination	10
2.2.2 Acid treatment	15
2.2.3 Copper sulphate	17
2.2.4 Other treatments.....	17
2.2.5 Root intrusion prevention	17
2.2.5.1 Treflan treatment	18
2.2.5.2 Other chemical anti-root intrusion treatments	18
2.2.6 Safety precautions.....	18
2.3 Inherent factors	19
2.3.1 Delivery rate versus pressure relationship.....	19
2.3.2 Flow path type	20
2.3.3 Manufacturing uniformity	22
2.3.4 Sensitivity to clogging	23
2.3.5 Other factors influencing the performance	23
2.4 Filtration	24
2.4.1 Pre-filtering.....	24
2.4.2 Filter types	25
2.4.3 Selection of filter	29
2.4.4 Selection of filter size of filter capacity.....	29
2.4.5 Maintenance schedule of filters	31
2.5 System maintenance	34
2.5.1 Monitoring and inspection of system	34
2.5.2 Flushing of system.....	34
2.5.3 Flushing of laterals	34
2.5.4 Evaluation of the delivery rate of emitters.....	35
2.5.5 Cleaning of the emitters.....	35

2.6	Clogging of emitters	36
2.6.1	Soil particles	36
2.6.2	Root intrusion of dripper orifices	36
2.6.3	Precipitates.....	36
2.6.4	Insects	36
2.7	Design.....	37
MATERIALS AND METHODS		39
3.1	Choice of emitters.....	39
3.2	Laboratory tests carried out on emitters	40
3.2.1	Delivery rate and coefficients of delivery rate variation (CV_q tests)	40
3.2.1.1.	Delivery rate test.....	40
3.2.1.2	Coefficient of variation (CV_q) test.....	40
3.2.1.3	Results.....	40
3.2.2	Comparative clogging test	41
3.3	Field tests (experimental site).....	41
3.3.1	Block information.....	41
3.3.1.1	Design.....	41
3.3.2	System installation and crop establishment.....	42
3.3.2.1	Preparation of the field	42
3.3.2.2	Installation of equipment	42
3.3.2.3	Crop establishment	42
3.3.3	System management	42
3.3.3.1	Scheduling	42
3.3.3.2	Flow recording.....	43
3.3.3.3	System monitoring and maintenance.....	44
3.3.3.4	Fertilizer application.....	45
3.3.3.5	Treflan application.....	45
3.3.3.6	Hardware maintenance	45
3.3.3.7	Filter cleaning	45
3.3.3.8	Lateral removal and installation of new materials.....	46
3.3.4	Water quality analyses.....	46
3.3.5	Tests on emitters retrieved from the experimental site.....	46
3.3.6	Physical inspection of clogged emitters	46
3.4	Field test (farm-sites).....	47
3.4.1	Block information.....	47
3.4.2	Water quality analysis	47
3.4.3	Filtration	47
3.4.4	System evaluation.....	48
RESULTS AND DISCUSSIONS		51
4.1	Description of emitters chosen for the investigation	51
4.2	Results of laboratory tests on emitters.....	51
4.2.1	Tests on new emitters	51
4.2.2	Tests on emitters retrieved from the experimental site.....	52
4.2.3	Laboratory test results of retrieved emitters	52
4.2.3.1	Functional and clogged emitters.....	53

4.2.3.2	Emitter discharge categories.....	61
4.2.3.2.1	Discharge categories of Zone 4.....	62
4.2.3.2.2	Discharge categories of Zone 5.....	65
4.2.3.2.3	Discharge categories of Zone 6.....	68
4.2.3.2.4	Discharge categories of Zone 7.....	72
4.2.3.2.5	Discharge categories of Zone 8.....	74
4.2.3.3	Root intruded and other clogged emitters.....	77
4.2.3.3.1	Percentage emitters root intruded to total emitters clogged: Zone 4.....	81
4.2.3.3.2	Percentage emitters root intruded to total emitters clogged: Zone 5.....	82
4.2.3.3.3	Percentage emitters root intruded to total emitters clogged: Zone 6.....	83
4.2.3.3.4	Percentage emitters root intruded to total emitters clogged: Zone 7.....	84
4.2.3.3.5	Percentage emitters root intruded to total emitters clogged: Zone 8.....	85
4.2.3.4	Physical inspection of clogged emitters.....	87
4.2.4	Laboratory: comparative clogging tests on new emitters.....	89
4.2.5	Lateral flow comparison: In-field versus laboratory.....	97
4.2.6	Summary of results from emitters from experimental site.....	97
4.3	Farm-site evaluations.....	99
4.3.1	Block information.....	99
4.3.2	Water quality analysis.....	100
4.3.3	Water samples.....	100
4.3.4	Soil samples.....	100
4.3.5	Filtration.....	101
4.3.6	System evaluation.....	101
CONCLUSIONS.....		103
5.1	Reaching the project objectives.....	103
5.2	The way forward.....	104
RECOMMENDATIONS.....		105
6.1	Water analysis and sampling.....	105
6.2	Water evaluation scale for SDI clogging hazard.....	107
6.3	Water treatment.....	108
6.4	Choice of equipment.....	109
6.4.1	Pump intake.....	109
6.4.2	Filters.....	109
6.4.3	Air valves.....	110
6.4.4	Pressure control valves.....	110
6.4.5	Flushing manifolds and laterals.....	110
6.4.6	Emitter type.....	110
6.5	Design principles.....	110
6.5.1	Filters.....	111
6.5.2	Emission uniformity.....	111
6.5.3	Flushing velocity of laterals.....	112
6.5.4	Design form/report.....	112
6.6	Installation.....	113
6.7	Maintenance.....	114
6.7.1	Filter operation.....	114

6.7.2	Lateral flushing	114
6.7.3	Use of chemicals, e.g. acid, chlorines and fertilizers.....	115
6.7.4	Use of root growth inhibitors.....	115
6.7.5	General.....	117
6.8	Management of soil water levels	118
