EXECUTIVE SUMMARY	ii
ACKNOWLEDGEMENTS	vi
TABLE OF CONTENTS	vii
LIST OF FIGURES	xi
LIST OF TABLES	xiv
<hr/>	
1 LITERATURE REVIEW	1
1.1 Water as a resource in South Africa	1
1.2 Water resource policy and legislation	2
1.2.1 Ecological integrity	3
1.2.2 Policy for protecting water resources	4
1.3 Water pollution	5
1.4 Treatment strategies	7
1.4.1 Chemical precipitation	7
1.4.2 Adsorption and ion exchange	10
1.4.3 Membrane technologies	10
1.4.4 Active biological treatment systems	11
1.4.5 Passive treatment systems	12
1.4.5.1 History of passive treatment	12
1.4.5.2 Mechanisms for contaminant removal	13
1.4.5.3 Oxidation and hydrolysis	14
1.4.5.4 Metal removal by plants and algae	16
1.4.5.5 Reduction processes	16
1.4.5.6 Limestone addition	17
1.4.6 Types of passive treatment systems	18
1.4.6.1 Aerobic wetland systems	18
1.4.6.2 Anaerobic (compost) wetlands	19
1.4.6.3 Anoxic limestone drains (ALDs)	19
1.4.7 Wetland size	20
1.4.8 Integrated biological treatment systems	21
1.5 General research hypothesis	22
<hr/>	

2	DIRECT TREATMENT OF AMD BY ALGAL BIOMASS - EFFICIENCY AND TOXIC EFFECTS	24
2.1	Introduction	24
2.1.1	Characteristics of <i>Spirulina</i>	25
2.2	Research aims	26
2.3	Materials and methods	26
2.3.1	Algal biomass	26
2.3.2	Determination of algal concentration	26
2.3.2.1	Dry mass determination	27
2.3.2.2	Photometric determination	27
2.3.2.3	Chlorophyll extractions	27
2.3.3	Analytical techniques	28
2.3.3.1	Acid digests	28
2.3.3.2	Carbohydrate determination	28
2.3.3.3	Light microscopy	28
2.3.3.4	Scanning electron microscopy (SEM)	29
2.3.4	Adsorption isotherms	29
2.3.5	Adsorption kinetics	30
2.3.6	Effluent treatment studies	30
2.3.7	Toxicity studies	31
2.4	Results and discussion	32
2.4.1	Adsorption isotherms	32
2.4.2	Adsorption kinetics	34
2.4.3	Effluent treatment studies	34
2.4.4	Toxicity studies	40
2.4.4.1	Copper	40
2.4.4.2	Zinc	46
2.4.4.3	Lead	51
2.5	Conclusions	54
<hr/>		
3	ALGAL MODIFICATION OF THE AQUEOUS ENVIRONMENT - THE ROLE OF CARBONIC ANHYDRASE	56
3.1	Introduction	56
3.1.1	Carbonic anhydrase	56
3.1.2	Structure of carbonic anhydrase	57
3.1.2.1	α -carbonic anhydrases	57
3.1.2.2	β -carbonic anhydrases	58
3.1.3	Catalytic mechanism	58
3.1.3.1	β -carbonic anhydrases	60

3.1.4	Inhibitors of carbonic anhydrase	60
3.1.5	Carbonic anhydrase in microalgae and cyanobacteria	60
3.1.5.1	Microalgae	61
3.1.5.2	Cyanobacteria	62
3.1.6	Implications for aqueous species equilibrium	63
3.2	Research aims	63
3.3	Materials and methods	64
3.3.1	Algal biomass	64
3.3.2	Carbonic anhydrase assay	64
3.3.2.1	Assay system	64
3.3.2.2	Sample preparation and partial purification	65
3.3.3	Titration method for determining the effect of algae on the aqueous chemistry	65
3.3.3.1	Analytical technique	65
3.3.3.2	Batch experiments	66
3.3.3.3	Effect of substrate concentration	66
3.3.3.4	Inhibitor studies	66
3.3.4	Alkalinity assay	67
3.3.5	Analysis and modelling of long term changes in aqueous chemistry	67
3.4	Results and discussion	67
3.4.1	Carbonic anhydrase assay	67
3.4.2	Batch experiments	69
3.4.2.1	Effect of substrate concentration	72
3.4.2.2	Inhibitor studies	73
3.4.3	Assessment of bioremediation potential	74
3.5	Conclusions	77
<hr/>		
4	AN INTEGRATED BIOLOGICAL SYSTEM AND PILOT PLANT STUDIES	79
4.1	Introduction	79
4.2	Research aims	80
4.3	Treatment of a base metal effluent by a <i>Spirulina</i> based system	81
4.3.1	Process description	81
4.3.2	Materials and methods	82
4.3.2.1	Analytical techniques	82
4.3.2.2	Effluent pH profile	82
4.3.2.3	Control reactors	83
4.3.2.4	Continuous operation	83

4.3.3	Results and discussion	84
4.3.3.1	Effluent pH profile	84
4.3.3.2	Control reactors	84
4.3.3.3	Continuous operation	87
4.4	Treatment of a synthetic acid mine drainage by an <i>Oscillatoria</i> sp. based system	89
4.4.1	Process description	89
4.4.2	Materials and methods	91
4.4.2.1	Analytical techniques	91
4.4.2.2	Operational parameters	91
4.4.3	Results and discussion	93
4.5	Cultivation of SRB on enriched, partially treated AMD	97
4.5.1	Materials and methods	97
4.5.2	Results and discussion	98
4.6	Scale-up considerations	99
4.7	Conclusions	100
<hr/>		
5	GENERAL DISCUSSION	102
<hr/>		
6	REFERENCES	106
<hr/>		
7	APPENDICES	121
Appendix A:	Risks and hazards	121
Appendix B:	Zarrouk's medium for the cultivation of <i>Spirulina</i> sp.	122
Appendix C	Standard curve of dry mass of <i>Spirulina</i> .	122
Appendix D	Standard curve of optical density.	123
Appendix E	Chlorophyll concentration calculations.	123
Appendix F	Standard curve of chlorophyll <i>a</i> .	123
Appendix G	Atomic absorption spectrophotometer program parameters for individual metal windows.	124
Appendix H	Standard curve for carbohydrate determinations.	125
Appendix I	Analysis of effluent from the Black Mountain base metal mine.	125
Appendix J	Research products	126
