
TABLE OF CONTENTS

TITLE PAGE.....	i
ACKNOWLEDGEMENTS.....	ii
EXECUTIVE SUMMARY.....	iv
TABLE OF CONTENTS	x
LIST OF TABLES.....	xiii
LIST OF FIGURES.....	xiv

CHAPTER 1

INTRODUCTION **1**

1.1	MOTIVATION	1
1.2	PROBLEM STATEMENT	2
1.3	METHODS	3
1.4	REPORT STRUCTURE	3

CHAPTER 2

LITERATURE REVIEW **5**

2.1	ECONOMIC THEORY OF WATER USE OPTIMISATION AND ITS APPLICATION	5
2.1.1	SINGLE PERIOD.....	6
2.1.2	MULTIPERIOD	8
2.1.3	MULTIPLE CROPS	10
2.1.4	IMPLICATIONS	13
2.2	EXAMPLES OF WATER USE OPTIMISATION	14
2.2.1	SOUTH AFRICAN RESEARCH.....	14
2.2.2	INTERNATIONAL RESEARCH.....	15
2.3	SKELETON MODELS	16
2.4	DYNAMIC LINEAR PROGRAMMING	16
2.4.1	DISEQUILIBRIUM – KNOWN LIFE.....	17
2.4.2	CALCULATION OF TERMINAL VALUES	19
2.5	PROCEDURES TO INCORPORATE RISK INTO MULTIPERIOD PROGRAMMING MODELS	20

2.6	CONCLUSIONS	22
-----	-------------	----

CHAPTER 3

STUDY AREA 23

3.1	GENERAL DESCRIPTION AND LOCATION	23
3.2	CLIMATE	23
3.3	SOIL	25
3.4	WATER DEMAND, DISTRIBUTION AND ALLOCATION	25
3.5	REPRESENTATIVE FARMS	26
3.5.1	FARM SIZE	26
3.5.2	CROP PRODUCTION	27
3.5.3	IRRIGATION REQUIREMENTS	28
3.5.4	CASH EXPENCES AND INCOME	29

CHAPTER 4

DESCRIPTION OF THE MULTIPERIOD RISK PROGRAMMING MODEL AND APPLICATION IN VAALHARTS 30

4.1	GENERAL DESCRIPTION	30
4.1.1	DOMAIN OF THE MODEL	32
4.1.2	DATA INPUT PARAMETERS	35
4.1.2.1	Water supply	35
4.1.2.2	Resource availability and use	38
4.1.2.3	Financial	41
4.1.3	CALCULATION OF THE PROGRAMMING MATRIX INPUT PARAMETERS	44
4.1.3.1	Parameters associated with variables	44
4.1.3.2	Parameters associated with the current situation	49
4.1.4	TERMINAL VALUES	51
4.1.5	BASE MODEL SPECIFICATION	54
4.1.5.1	Objective function	54
4.1.5.2	Cash surplus and taxable income	55
4.1.5.3	Financing operating cost and irrigation system investments	57
4.1.5.4	Irrigation system	59
4.1.5.5	Resource use	59
4.1.5.6	Irrigation water supply	60
4.1.6	RISK SKELETON MODEL	63
4.1.6.1	Data input	63
4.1.6.2	Calculation of programming matrix input parameters	64
4.1.6.3	Risk model specification	64

4.2	APPLICATION OF THE SKELETON DYNAMIC LINEAR PROGRAMMING MODEL IN VAALHARTS	65
4.2.1	DOMAIN OF THE APPLICATION AND WATER SUPPLY	65
4.2.2	RESOURCE AVAILABILITY AND USE	65
4.2.3	FINANCIAL	67
4.3	ESTIMATING GROSS IRRIGATION REQUIREMENTS AND CROP YIELDS WITH SAPWAT UNDER LIMITED WATER SUPPLY CONDITIONS	67
4.3.1	INCORPORATING COEFFICIENT OF UNIFORMITY	67
4.3.2	CROP YIELD ESTIMATION	69
4.4	CALCULATION OF RISK PARAMETERS	70

CHAPTER 5

RESULTS AND CONCLUSIONS **72**

5.1	DEFINING ALTERNATIVE SCENARIOS	72
5.2	RE-ALLOCATION OF WATER WITHOUT RISK	73
5.3	RE-ALLOCATION OF WATER TAKING RISK INTO ACCOUNT	75
5.4	TIMING OF WATER SHORTAGES	77
5.5	GENERAL CONCLUSIONS	78

IMPLICATIONS **79**

REFERENCES **83**

APPENDIX A: EXAMPLE OUTPUT FROM SKELETON MODULE	90
APPENDIX B: RISK SIMULATION MODULE	108
APPENDIX C: ENTERPRISE BUDGET	116
APPENDIX D: SKELETON MODEL INPUT PARAMETERS	125
APPENDIX E: PRODUCTION FUNCTION ENVELOPE	136

LIST OF TABLES

TABLE 3.1:	UTILISATION OF IRRIGATION SYSTEM BY FARM SIZE. _____	28
TABLE 3.2:	MONTHLY SAPWAT ESTIMATED GROSS IRRIGATION WATER REQUIREMENTS (MM.HA) FOR SELECTED CROPS UNDER FLOOD AND PIVOT IRRIGATION IN VAALHARTS. _____	29
