

PRELIMINARY GUIDELINES FOR THE PLANNING, DESIGN AND OPERATION OF FISHWAYS IN SOUTH AFRICA

TABLE OF CONTENTS

		PAGE
	EXECUTIVE SUMMARY	i
	ACKNOWLEDGEMENTS	vii
	PREFACE	1
CHAPTER 1	Introduction	2
CHAPTER 2	Summary of Protocols	8
	2.1 Introduction	8
	2.2 Outline of Procedures	8
	2.3 Necessity Protocol	9
	2.4 Priority Protocol	10
	2.5 Biological constraints	11
	2.6 Hydrological and Hydraulic Considerations	12
	2.7 Topographical Considerations	13
	2.8 Choosing the Appropriate Fishway Type	14
	2.9 Fishway Dimensions and Design	15
	2.10 Construction Protocol	16
	2.11 Monitoring and Operational Management	17
CHAPTER 3	Biological Background to Necessity Protocol	18
	3.1 Introduction	18
	3.2 Criteria indicating that a fishway is not required or feasible	18
	3.2.1 Natural absence of indigenous aquatic species	18
	3.2.2 Height or design of the structure ensures that fishway provision is not feasible	19
	3.2.3 Alternative and more cost effective mitigation is available and feasible	20
	3.2.4 Negative ecological impacts of providing a fishway outweighs the benefits	21
	3.2.5 Drown-out characteristics of barrier	21
	3.3 Summary	21
CHAPTER 4	Background to Priority Rating Protocols	23
	4.1 Introduction	23
	4.2 Criteria for Assessment	23
	4.3 Quantitative Assessment of Barrier Impact (Ranking Scheme)	24

	4.3.1	Ranking Scheme A	24
	4.3.2	Ranking Scheme B	25
	4.3.3	Recommendations	26
CHAPTER 5		Biological Constraints on Fishway Design	27
	5.1	Introduction	27
	5.2	Migratory Regions	27
	5.2.1	Coastal Migratory Regions	27
		5.2.1.1 Fish Species	28
		5.2.1.2 Macrocrustacea	28
	5.2.2	Inland River Systems	29
	5.3	Swimming Ability	29
	5.3.1	Speed and Endurance	29
	5.3.2	Physiological Factors	29
	5.3.3	Relevance to Fishway Designs	30
	5.3.4	Measured Swimming Speeds of Fish - Overseas Studies	30
	5.3.5	Measured Swimming Speeds of Fish - South African Studies	31
	5.3.6	Recommended Maximum Current Velocities	33
		5.3.6.1 Coastal Fishways	33
		5.3.6.2 Inland Fishways	33
		5.3.6.3 Turbulence	33
	5.4	Swimming Behaviour and Preferences	33
	5.4.1	Small fish (under 150mm in length)	33
	5.4.2	Large fish (over 150mm in length)	34
	5.4.3	Anguillid eels	34
	5.4.4	Macrocrustacea	34
	5.4.5	Migratory Characteristics of important coastal migratory species	34
	5.4.6	Reasons for migrations	35
	5.4.7	Timing of migrations and hydrology	35
CHAPTER 6		Site Specific Considerations	37
	6.1	Hydrology	37
	6.2	Hydraulic Considerations	40
	6.2.1	General	40
	6.2.2	Water level fluctuations at the barrier	41
	6.2.3	Changes in river bed due to construction of weir and/or fishway	41
	6.2.4	Fishway Entrance	41
	6.2.5	Fishway Exit	42
	6.2.6	Auxiliary and attraction water	43

6.3	Sediment and Debris	43
6.4	Topographical Considerations	43
6.5	Height of Instream Barrier	44
6.6	Cost of fishways	44
6.7	Operating Rules and Water Release Mechanisms	45
CHAPTER 7	Design Guidelines	
7.1	Introduction	46
7.2	Definition of Parameters	46
7.3	Selection of Fishway Dimensions	47
7.3.1	Drop between successive pools	48
7.3.2	Length of pools	49
7.3.3	Depth of pools	49
7.3.4	Width of pools	49
7.3.5	Volume in the pool	49
7.3.6	Weir Shape	49
7.4	Design of a pool and weir fishway with a full width horizontal weir	50
7.4.1	Dimensions	50
7.4.2	Discharge	51
7.4.3	Turbulence	52
7.4.4	Evaluation of fishway	52
7.5	Design of a pool and weir fishway with a notch weir	53
7.5.1	Dimensions	53
7.5.2	Discharge	54
7.5.3	Turbulence	54
7.5.4	Evaluation of fishway	54
7.5.5	Comparison of the full width with notched weir	56
7.6	Design of a pool and weir fishway with a sloping weir	56
7.6.1	Dimensions	56
7.6.2	Discharge	57
7.6.3	Turbulence	58
7.6.4	Evaluation of fishway	58
7.6.5	Comparison with notched weir	58
7.7	Vertical Slot fishway	59
7.7.1	Dimensions	59
7.7.2	Depth of flow in the pools and discharge	59
7.7.3	Turbulence	61
7.7.4	Evaluation of fishway	61

7.8	Pool and Slot fishway	63
7.9	Selection of appropriate fishway	65
7.9.1	Hydrological data	65
7.9.2	Barriers in Kowie and Kei rivers	67
7.9.3	Design criteria	69
7.9.4	Kowie River	69
7.9.5	Great Kei River	71
7.9.6	Conclusion	71
7.10	Design of a fishway for small fish	71
7.11	Concluding Remarks	73
CHAPTER 8 Monitoring and Operational Management		
8.1	Introduction	74
8.2	Fishway Monitoring Protocol	74
8.2.1	Key Questions	74
8.2.1.1	Biological/Ecological Parameters	74
8.2.1.2	Physical Parameters	75
8.2.2	Data Collection	75
8.2.2.1	Fish capture	75
8.2.2.2	Sampling Downstream (and Upstream) of the fishway	76
8.2.2.3	Sampling in the fishway	77
8.2.2.4	Data collected from fish	77
8.2.2.5	Fish tagging or marking	77
8.2.2.6	Abiotic Data	78
8.2.2.7	Incidental observations	78
8.2.3	Monitoring Period and Frequency	78
8.2.3.1	Long-term, low intensity Monitoring	79
8.2.3.2	Intensive, Short-term Monitoring	79
8.2.4	Supporting Studies	80
8.3	Management	80
8.4	Conclusions	80
CHAPTER 9 References		81
LIST OF PLATES		
Plate 1.1	Notched weir fishway under construction – Komatipoort	4
Plate 1.2.	Notched weir fishway- Komatipoort	4
Plate 1.3	Pool and slot fishway – KNP	5
