
CONTENTS

EXECUTIVE SUMMARY	i
ACKNOWLEDGEMENTS	v
CONTENTS	vii
1. INTRODUCTION	
1.1 INTRODUCTION	1-3
1.2 GENERAL CONTEXTUAL ISSUES	1-3
1.2.1 National water resource monitoring in a changing environment	1-3
1.2.2 Balancing achievement of objectives and affordability	1-3
1.3 REQUIREMENTS OF THE MANUAL	1-4
2. MONITORING OBJECTIVES	
2.1 INTRODUCTION	2-3
2.2 CONSISTENCY WITH SURFACE WATER RESOURCE MONITORING ...	2-3
2.3 CURRENT AND ENVISAGED GROUNDWATER MONITORING	2-5
2.4 CONSISTENCY WITH NATIONAL TOXICANTS MONITORING	2-6
2.5 RECOMMENDED MONITORING OBJECTIVES	2-7
2.6 CONCLUSION	2-8
3. LITERATURE REVIEW	
3.1 INTRODUCTION	3-3
3.2 WATERBORNE DISEASE	3-4
3.2.1 Definition of waterborne disease	3-4
3.2.2 Burden of waterborne disease	3-4
3.3 PATHOGENS OCCURRING IN GROUNDWATER	3-5
3.3.1 Viruses	3-6
3.3.2 Bacteria	3-6
3.3.3 Protozoa	3-7
3.4 CONTAMINATION OF GROUNDWATER	3-7
3.4.1 Sources of contamination	3-8
3.4.2 Movement of microbes through soil	3-8
3.4.3 Survival of microbes in soil and groundwater	3-11
3.5 INDICATORS OF FAECAL POLLUTION	3-13
3.5.1 Introduction	3-13
3.5.2 Bacterial indicators	3-14
3.5.2.1 Total coliform bacteria	3-14
3.5.2.2 Faecal coliforms	3-14
3.5.2.3 Faecal streptococci	3-14
3.5.2.4 Sulfite reducing clostridia and other anaerobes	3-15

	3.5.2.5	Detection of total and faecal coliforms	3-15
3.5.3		Bacteriophages as indicators of enteric viruses	3-16
	3.5.3.1	Introduction	3-16
	3.5.3.2	Somatic coliphages	3-17
	3.5.3.3	F-RNA Phages	3-17
	3.5.3.4	Bacteriophages infecting <i>Bacteroides fragilis</i>	3-18
	3.5.3.5	Conclusion	3-18
3.5.4		Viruses	3-19
	3.5.4.1	Introduction	3-19
	3.5.4.2	Detection	3-19
3.5.5		Parasites	3-20
	3.5.5.1	Introduction	3-20
	3.5.5.2	Detection	3-20
3.6		WATER QUALITY GUIDELINES	3-21
	3.6.1	Bacteria and viruses	3-21
	3.6.2	Parasites	3-21

4. MONITORING VARIABLES

4.1		INTRODUCTION	4-3
4.2		TRADITIONAL APPROACHES	4-3
	4.2.1	Introduction	4-3
	4.2.2	Comparative analysis	4-3
	4.2.3	Assessment of relative suitability	4-8
4.3		ALTERNATIVE OPTIONS	4-9
	4.3.1	Introduction	4-9
	4.3.2	Quantitative versus qualitative	4-9
	4.3.3	Wanted: dead or alive?	4-10
	4.3.4	Detecting bacteria	4-10
	4.3.5	Bacteriophages as indicators of viruses	4-11
	4.3.6	Detecting viruses	4-11
	4.3.7	Inorganic monitoring variables	4-11
4.4		THE 24 HOUR PROBLEM	4-12
4.5		FINAL ANALYSIS AND CONCLUSION	4-13
	4.5.1	Introduction	4-13
	4.5.2	Viruses	4-13
	4.5.3	Bacteria	4-14

5. MONITORING PHILOSOPHY

5.1		INTRODUCTION	5-3
5.2		DELINEATION OF AQUIFERS	5-3
5.3		GENERAL FACTORS AFFECTING CHOICE OF MONITORING SITES	5-4
	5.3.1	Achieving monitoring objectives	5-4
	5.3.2	Local nature of groundwater contamination	5-4
	5.3.3	Resource limitations	5-5
	5.3.4	Effect of monitoring borehole on contamination	5-5
5.4		BACKGROUND TO THE MONITORING PHILOSOPHY	5-6
	5.4.1	Implications of local nature of groundwater contamination	5-6
	5.4.2	Monitoring pollution sources versus points of use	5-7

5.4.3	Scenario 1: No obvious faecal pollution source	5-8
5.4.4	Scenario 2: Single pollution point source	5-8
5.4.5	Scenario 3: Diffuse pollution source	5-10
5.4.6	Summary of usefulness of data	5-10
5.4.7	Monitoring effectiveness of containment	5-10
5.4.8	Making statements about the aquifer as a whole	5-12
5.4.9	Summary	5-14
5.5	MICROORGANISM TRAVEL TIMES	5-15
5.5.1	Introduction	5-15
5.5.2	Establishing microorganism travel times	5-15
5.6	CHOOSING SIGNIFICANT POLLUTION SOURCES	5-17
5.7	ANNUAL DATA ASSESSMENT	5-18
6. PRIORITISATION		
6.1	INTRODUCTION	6-3
6.2	FACTORS AFFECTING PRIORITISATION	6-3
6.2.1	Introduction	6-3
6.2.2	Demonstration of achievement of objectives	6-3
6.2.3	Availability of resources	6-4
6.2.4	Problematic land uses	6-5
6.2.5	Groundwater flow regimes	6-5
6.2.6	Sensitive water uses	6-6
6.2.7	Strategic water uses	6-6
6.2.8	Summary	6-6
6.3	CURRENT PRIORITISATION TOOLS	6-7
6.3.1	Potential vulnerability map	6-7
6.3.2	Groundwater management classification map	6-7
6.3.3	Summary	6-8
6.4	RECOMMENDED PROCESS	6-9
7. PILOT STUDIES		
7.1	INTRODUCTION	7-3
7.2	FOCUS ISSUES	7-3
7.2.1	Core design	7-3
7.2.2	Viruses	7-4
7.3	CONCLUSION AND RECOMMENDATIONS	7-5
7.3.1	Pilot study period	7-5
7.3.2	Testing core design	7-6
7.3.3	Developing virus monitoring protocols	7-6
7.3.4	Potential pilot study sites	7-6
8. CONCLUSIONS AND RECOMMENDATIONS		
8.1	CONCLUSIONS	8-3
8.2	RECOMMENDATIONS	8-4
