## TABLE OF CONTENTS

		Page No		
1	BACKGROUND	1		
1.1	THE OVERALL OBJECTIVES OF THE PROJECT			
1.2	DESCRIPTION OF THE RESEARCH PRODUCTS	6		
1.3	METHODOLOGY	6		
1.4	LAYOUT OF THE REPORT	9		
2	PREDICTION OF RUN-OFF SALINITY USING ACRUSAL	inity10		
2.1	DELINEATION OF THE BERG RIVER CATCHMENT	10		
	2.1.1 Origin to G1H020	11		
	2.1.2 G1H020 to G1H036			
	2.1.3 G1H036 to G1H013	14		
	2.1.4 G1H013 to G1R003			
2.2	DATA PREPARATION FOR THE ACRU MODEL	18		
	2.2.1 Preparation of the rainfall data			
	2.2.2 Origin to gauging station G1H020	22		
	2.2.3 Gauging stations G1H020 to G1H036			
	2.2.4 Gauging Stations G1H036 to G1H013	23		
	2.2.5 Gauging stations G1H013 to G1R003	24		
	2.2.6 Land-use			
	2.2.7 G1H020 to G1H036			
	2.2.8 G1H036 to G1H013			
	2.2.9 G1H013 to G1R003			
2.3	FARM DAMS	31		
	2.3.1 G1H020 to G1H036	34		
2.4	FLOW VERIFICATION OF THE ACRU MODEL	35		
	2.4.1 Verification at G1H037	25		
	2.4.1 Verification at G1H037			
	2.4.3 Verification at G1H036.			
	2.4.4 Verification at G1H002/G1H028	AR		
	2.4.5 Verification at G1H008	50		
	2.4.7 Flow verification at G1H045 (Sandspruit River)			
2.5	SALINITY VERIFICATION OF THE ACRU MODEL	59		
	2.5.1 Salinity verification at G1H037	59		
	2.5.2 Salinity verification at G1H041			
	2.5.3 Salinity verification at G1H036			
	2.5.4 Salinity verification at G1H043			
	2.5.5 Salinity verification at G1H013			
	2.5.6 Salinity verification at G1H035			
	2.5.7 Salinity verification at G1R003
