

TABLE OF CONTENTS

EXECUTIVE SUMMARY	i
ACKNOWLEDGEMENTS	ix
TABLE OF CONTENTS	x
LIST OF TABLES	xiii
LIST OF FIGURES	xv
GLOSSARY OF TERMS	xviii
1 INTRODUCTION	1
1.1 Background and motivation	1
1.2 Aim of the study.....	1
1.3 Tasks for the conduction of the research	1
1.3.1 Literature study	2
1.3.2 Field investigation.....	2
1.3.3 Experimental tests	2
1.3.4 Selection Criteria for liner systems and pipeline material.....	2
1.3.5 Technology Transfer	2
1.4 Layout of the report	2
2. LITERATURE REVIEW	4
2.1 Basic theory of loss determination in pipelines	4
2.1.1 Introduction	4
2.1.2 The history of the friction formulae	4
2.1.3 Increase in losses coefficient with age for small diameter pipes.....	16
2.1.4 Local head losses.....	18
2.1.5 Couplings	23
2.2 Pipe material	26
2.3 The influences of biofilm on the hydraulic characteristics of pipe flow.....	27
2.3.1 Introduction	27
2.3.2 An introduction to biofilm.....	27
2.3.3 Physical properties of biofilm	28
2.3.4 Shape and structure of biofilm	29
2.3.5 Growth and detachment of bacteria.....	29
2.3.5.1 <i>Introduction</i>	29
2.3.5.2 <i>The development of Biofilm</i>	29
2.3.5.3 <i>Transportation process inside a pipe with biofilm</i>	31
2.3.5.4 <i>Detrimental effects of biofilm</i>	32
2.3.6 Disinfection of distribution systems.....	32
2.3.6.1 <i>Chlorination of biofilm</i>	32
2.3.6.2 <i>Alternative disinfectants</i>	33
2.3.6.3 <i>Resistance of biofilm to disinfectants</i>	33
2.4 Operating pressure and flow rate	34
2.5 Liner systems	34
2.5.1 Water quality in relation with the liner system	34
2.5.2 Linings and rehabilitation.....	34
2.5.3 Provisional criteria for grouted linings for renovating steel.....	34
3. FIELD WORK	36
3.1 Introduction.....	36
3.2 Pipelines that were tested.....	36

3.2.1	Bloem Water – Pipelines.....	36
3.2.1.1	<i>Pipeline description</i>	36
3.2.1.2	<i>Instrumentation used and data collection</i>	37
3.2.1.3	<i>Bloem Water pipeline tests</i>	39
3.2.1.4	<i>Field investigation results</i>	43
3.2.2	Umgeni Water – Bulk water supply scheme to Ndwedwe.....	45
3.2.2.1	<i>Pipeline description</i>	45
3.2.2.2	<i>Instrumentation used</i>	49
3.2.2.3	<i>Results that were obtained</i>	49
3.2.3	Rand Water – Zwartkopjes pumps system.....	54
3.2.3.1	<i>Introduction</i>	54
3.2.3.2	<i>Pipeline description</i>	56
3.2.3.3	<i>Instrumentation used and location where the pressure and flow recordings were conducted</i>	56
3.2.3.4	<i>Results that were obtained from the field tests</i>	57
3.2.3.5	<i>Comparison of the result with the normative roughness criteria used in the Water Industry</i>	59
3.2.4	Magalies Water Pipelines.....	60
3.2.4.1	<i>Pipeline description</i>	60
3.2.4.2	<i>Instrumentation used</i>	61
3.2.4.3	<i>Results that were obtained</i>	61
3.3	Physical evaluation of the friction parameters in pipelines – Knysna Pipeline	66
3.4	Biofilm growth in pipelines – the B12 Pipeline.....	67
3.5	Conclusion	68
4.	EXPERIMENTAL WORK.....	69
4.1	Introduction to experimental work.....	69
4.2	Measurement of energy loss at couplings in pipelines (Test set-up 1)	69
4.2.1	Introduction	69
4.2.2	Experimental Test set-up 1.....	70
4.2.3	Results obtained from Test set-up 1	73
4.3	Measurement of energy loss at couplings in pipelines (Test set-up 2)	80
4.3.1	Introduction	80
4.3.2	Experimental Test set-up 2.....	81
4.3.3	Results obtained from Test set-up 2.....	86
4.4	CFD modelling of losses at different coupling layouts.....	89
4.4.1	Introduction	89
4.4.2	Geometry building and grid generation.....	90
4.4.2.1	<i>Geometry building</i>	90
4.4.2.2	<i>Grid generation</i>	90
4.4.3	CFD modelling.....	91
4.4.3.1	<i>Solver settings</i>	91
4.4.3.2	<i>Boundary Conditions</i>	91
4.4.3.3	<i>Fluid Properties</i>	92
4.4.4	Results.....	92
4.4.5	Conclusion.....	97
4.5	Biofilm growth and fouling on different pipe materials	97
4.5.1	Introduction	97
4.5.2	Methods used to evaluate the biofilm growth status	98
4.5.2.1	<i>DAPI Staining and UV-Light Microscopy</i>	98
4.5.2.2	<i>Determination of the Number of Culturable Cells (Plate Count)</i>	99
4.5.2.3	<i>Scanning Electron Microscopy (SEM)</i>	99

4.5.3	Experimental investigation of the growth potential of biofilm on different pipe materials	100
4.5.3.1	<i>Introduction</i>	100
4.5.3.2	<i>Using the modified Pedersen device to determine the biofilm growth on different pipe materials</i>	101
4.5.3.3	<i>Results of the biofilm growth as detected by the DAPI Stained and UV-Light Microscopy</i>	102
4.5.3.4	<i>Results of the biofilm growth as detected by the determination of the Number of Cuturable Cells (Plate count)</i>	103
4.5.3.5	<i>Results of the biofilm growth as detected by the Scanning Electron Microscopy</i> . 105	
4.5.4	The resilience of biofilm against disinfectants and the rate of regrowth after disinfection	112
4.5.4.1	<i>Evaluation of the regrowth of biofilm as measured with the MPD</i>	112
4.5.4.2	<i>Results of the biofilm regrowth after disinfection as detected by the number of culturable cells (Plate Count)</i>	112
4.5.5	The effect of increased velocity on biofilm growth	113
4.5.5.1	<i>Introduction</i>	113
4.5.5.2	<i>Rotoscope</i>	113
4.5.5.3	<i>Preparation of the Rotoscope</i>	114
4.5.5.4	<i>Results of the biofilm growth as detected by the Rotoscope</i>	115
4.5.6	Review of the influence of velocity on biofilm growth	120
4.6	Development of a method to monitor the growth of biofilm by the use of light reflection	121
4.6.1	Introduction	121
4.6.2	The conceptual development of the Rotoscope.....	121
4.6.3	Experimental design	121
4.6.4	Pipe materials tested.....	125
4.6.5	Results and discussion.....	127
4.6.6	Other methods to determine biofilm growth	129
4.6.6.1	<i>DAPI staining and UV-light microscopy</i>	129
4.6.6.2	<i>Scanning electron microscopy (SEM)</i>	130
4.6.7	Conclusion.....	131
5.	PIPE LININGS AND REHABILITATION.....	132
5.1	Introduction.....	132
5.2	Criteria for liners	132
5.3	Planning considerations and rehabilitation options.....	133
5.4	Liner rehabilitation methods	138
5.4.1	Slip lining	138
5.4.2	Cement mortar linings (CML).....	139
5.4.3	Pipe coated linings	140
5.4.4	Cured in place linings.....	141
5.4.5	CemPipe	141
5.4.6	Alternative protection methods	142
5.5	Factors influencing the selection of liner systems	142
5.6	Life Cycle Cost Analysis	143
6.	SUMMARY AND CONCLUSIONS	144
7.	SUMMARY AND CONCLUSIONS	145
8.	RECOMMENDATIONS	146
9.	REFERENCES	147
APPENDIX A COMPUTATIONAL FLUID DYNAMICS (CFD) DATA FILES		152
