

C O N T E N T S

<u>SUMMARY</u>	(i)
<u>ACKNOWLEDGEMENTS</u>	(vi)
<u>CONTENTS</u>	(viii)
1. <u>INTRODUCTION</u>	1
2. <u>REVIEW OF ALLELOPATHY IN AQUATIC PLANTS</u>	5
1. Introduction	5
2. Allelopathy between species of phytoplankton	6
3. Allelopathy between aquatic macrophytes and microflora	10
4. Allelopathy between aquatic macrophytes	13
5. Nature of allelopathic compounds	15
6. Conclusion.....	16
3. <u>ALLELOPATHIC POTENTIAL OF EICHHORNIA IN VERNON HOOPER DAM</u>	18
1. Introduction	18
2. Methods	20
3. Results	29
4. Discussion	47
5. Conclusions	50

4.	<u>VERNON HOOPER DAM CASE STUDY</u>	51
1.	Introduction	51
2.	Temporal variation in <u>Eichhornia</u> cover, phytoplankton standing crop and species composition and water quality	58
3.	Interaction between hyacinth cover and phytoplankton	99
4.	General conclusions	116
5.	<u>HARTBEESSPOORT DAM CASE STUDY</u>	118
1.	Introduction	118
2.	Temporal variation in <u>Eichhornia</u> cover, phytoplankton standing crop and species composition and nutrient loading rates	121
3.	Effect of <u>Eichhornia</u> cover on the phytoplankton standing crop and species composition of Hartbeespoort Dam	140
4.	Conclusions	153
6.	<u>PROSPECTS OF USING EICHHORNIA TO IMPROVE WATER QUALITY</u>	154

7.	<u>RESEARCH NEEDS</u>	160
8.	<u>REFERENCE LIST</u>	162
9.	<u>PERSONAL COMMUNICATIONS</u>	174
	<u>APPENDIX 1</u>	175
