

ACKNOWLEDGEMENT

The research in this report emanated from a formal collaboration between COMRO (Division of Mining Technology, CSIR) and the Water Research Commission. The title of the project was:

DETERMINATION OF THE REACTION KINETICS IN A SPARRO SEED REACTOR.

The financing of the project by the Water Research Commission and the contribution by members of the Commission and the mining industry are acknowledged.

**DETERMINATION OF THE REACTION KINETICS
IN A SPARRO SEED REACTOR**

CONTENTS

	PAGE
1. INTRODUCTION	1
2. AIMS OF RESEARCH PROJECT	2
3. EXPERIMENTAL WORK	2
3.1 Pilot Seed Reactor (Kinetic Study)	2
3.1.1 Description	2
3.1.2 Monitoring	3
3.1.3 Method	3
3.1.4 Delays	4
3.2 Performance of Tubular Membrane Modules	5
3.2.1 SPARRO plant converted to MLT mode	5
3.2.2 Individual module performance	6
4. RESULTS	6
4.1 Pilot Seed Reactor (Kinetic Study)	6
4.1.1 Discussion	9
4.2 Performance of Tubular Membrane Modules	10
4.2.1 Overall plant performance	11
4.2.2 Individual module performance	11
5. DISCUSSION	15
5.1 Experimental Results in Kinetic Study	17
5.2 Performance of Tubular Membrane Modules	17
5.2.1 Comparison of tests of 1990 and early 1992	18
5.2.2 Comparison of tests of early 1992 and present study	18
5.3 Possible Influence of Radioactivity on Membrane Degradation	22
6. CONCLUSIONS	23
6.1 Kinetic Study	23
6.2 Performance of Tubular Membrane Modules	24

6.2.1	Overall plant performance	24
6.2.2	Individual module performance	24
6.3	Appropriate Designs for SPARRO Seed Reactors	25
6.4	General	25
7.	ADDITIONAL INVESTIGATIONS FOR CONSIDERATION	25
7.1	Method	26
7.1.1	Recommissioning the SPARRO plant	26
7.1.2	Operating the pilot plant	27
7.2	Motivation for Continued Research	27
8.	REFERENCES	29
Appendix A -	Review of Previous Work in 1989 and 1990	30
Appendix B -	Performance of SPARRO Plant in Early 1992	37
Appendix C -	Kinetic Study: Proposed Procedure for Experiments to Determine Degree of Variance to be Expected in Test Work	41

LIST OF TABLES

1	Modules Selected for Detailed Monitoring, with their Positions in SPARRO Plant	6
2	Summary of Experimental Conditions in Kinetic Study	8
3	Kinetic Study: Chemical Analyses of Samples Taken during Experiment 1	9
4	Kinetic Study: Chemical Analyses of Samples Taken during Experiment 2	16
5	Summarised Record of All Tests Carried out on SPARRO Plant	20
A-1	Summarised Record of Simultaneous Tests on MLT and SPARRO Plants in 1989	32

A-2	Summarised Record of Simultaneous Tests on MLT and SPARRO Plants in 1990	33
A-3	Main Differences Between MLT and SPARRO Plants Operated in 1989 and 1990	36

LIST OF FIGURES

1	Variation in Corrected Membrane Flux	12
2	Variation in Membrane Salt Rejection	13
3	Selected Module Salt Rejection	14
4	Selected Module Flux	16
B-1	January-February 1992: Average Salt Rejection of Module Rows	38
B-2	January-February 1992: Average Fluxes (Uncorrected) of Module Rows	39
