

TABLE OF CONTENTS

CHAPTER	PAGE
EXECUTIVE SUMMARY	vi
ACKNOWLEDGEMENTS	xv
LIST OF TABLES	xvii
LIST OF FIGURES	xxvi
LIST OF APPENDICES	xxx
LIST OF SYMBOLS	xxxii
CHAPTER	
1. GENERAL INTRODUCTION	1
2. LITERATURE SURVEY	4
2.1 Introduction	4
2.2 Background to the Study	4
2.3 Management of irrigation application methods	5
2.4 Effects on soil	5

2.5	Plant response to salinity	6
2.5.1	Growth responses	6
2.5.2	Physiological responses	9
2.5.3	Factors that influence salt tolerance	16
2.5.4	Evaluation of crop salt tolerance	21
2.5.5	Salt tolerance of agronomic groups	26
3.	EXPERIMENTAL METHODS AND MATERIALS OF LABORATORY SCREENING	28
3.1	Introduction	28
3.2	Culture Methods	28
3.2.1	Germination	28
3.2.2	Seedling growth	29
3.2.3	Vegetative growth stage	34
3.3	Mine waters used in trials	35
3.4	Units used for salinity	37
4.	RESULTS OF LABORATORY SCREENING OF AGRONOMIC AND PASTURE SPECIES	41
4.1	Introduction	41
4.2	Subtropical annuals	42
4.2.1	Maize (sorghum and babala)	42
4.2.2	Legumes (soybean, dry bean & cowpea)	54
4.2.3	Sunflower	63
4.2.4	Potato	64

4.3	Subtropical perennials	66
4.3.1	Introduction	66
4.3.2	Results	66
4.3.3	Conclusion for subtropical perennials	69
4.4	Temperate annuals	69
4.4.1	Introduction	69
4.4.2	Germination	70
4.4.3	Seedling growth	70
4.4.4	Vegetative growth	74
4.4.5	Conclusion for temperate annuals	77
4.5	Temperate perennials	78
4.5.1	Introduction	78
4.5.2	Germination	78
4.5.3	Seedling growth	79
4.5.4	Vegetative growth of temperate perennials	80
4.5.5	Conclusion for temperate perennials	82
4.6	Possible mechanisms by which the salinity of different mine waters influenced crop seedling growth	83
4.7	General Conclusion	85
5.	FIELD TRIAL AND SCREENING OF POTENTIAL FORAGE SPECIES . . .	156
5.1	Introduction	156
5.2	Location and environmental characteristics	156
5.3	Experimental scheme	157

5.4	Screening of potential forage species	158
5.4.1	Methodology	158
5.4.2	Results and Discussion	160
5.4.3	Conclusions and Recommendations	164
5.5	Field trial	164
5.5.1	Agronomic techniques	166
5.5.2	Water supply scheme	166
5.5.3	Field measurements	167
5.5.4	Results and discussion	172
5.5.5	Conclusions	175
6.	CROP GROWTH AND WATER BALANCE - SOIL SALINITY MODEL . .	220
6.1	Introduction	220
6.2	Theoretical overview of the model	220
6.2.1	The atmospheric environment	223
6.2.2	The soil environment	227
6.2.3	Crop growth	238
6.3	Results and Discussion	242
6.3.1	Crop growth parameters	242
6.3.2	Verification of the model	249
6.3.3	Model sensitivity analysis	252
6.3.4	Crop salt tolerance	255
6.4	CONCLUSIONS	256
7.	IDENTIFICATION OF PROMISING WETLAND SPECIES	281
7.1	Introduction	281

7.2	Methodology	282
7.3	Results	282
7.4	Conclusions and Recommendations	283
8.	SOIL INVESTIGATION : COLUMN STUDY	286
8.1	Introduction	286
8.2	Materials and Methods	286
8.3	Discussion of Results	288
	8.3.1 Growth of Wheat	288
	8.3.2 Chemical analyses of soils	289
8.4	Conclusions	292
9.	CONCLUSIONS	297
