

TABLE OF CONTENTS

EXECUTIVE SUMMARY	i
ACKNOWLEDGEMENTS	ix
TABLE OF CONTENTS	x
LIST OF FIGURES	xii
LIST OF TABLES	xiv
GLOSSARY OF ABBREVIATIONS	xviii
1 INTRODUCTION	1
1.1 Motivation	1
1.2 Summary of previous work	2
1.3 Relationship between previous work and this study	6
2 A METHODOLOGY FOR ASSIGNING A FINANCIAL COST TO POLLUTION FROM SANITATION SYSTEMS	8
2.1 Identification of impacts of contaminants from sanitation systems	8
2.2 Principles of assigning a financial cost to the impact of contamination from sanitation systems	12
2.3 Possible remedial measures for costing purposes	15
2.4 Other principles	16
2.5 Steps in the detailed application of the methodology	17
2.6 Modelling principles	20
3 PLANNING SECTOR	22
3.1 Definition of the area of study	22
3.2 Choice of unit areas	25
3.3 Demographic data	30
3.4 Settlement patterns	37
3.5 Current coverage of sanitation in Gauteng	39
3.6 Allocation of population and sanitation type to catchment areas	43
3.7 Possible future scenarios for population and sanitation type	45
3.8 Allocation of settlement patterns to groundwater catchments	45
4 WATER QUALITY SECTOR	47
4.1 Contaminant pathways	47
4.2 Rate of movement of contaminants in the subsurface	50
4.3 Contaminant loads discharged to and from different levels of service of sanitation	53
4.4 Lake response to nutrient loading	78
4.5 Hydrology using Water Resources 90	100

5	COSTING SECTOR	102
5.1	Costing of water treatment for surface water	102
5.2	Costing of water treatment for groundwater	110
5.3	Costs of other remedial measures	112
5.4	Translation of costs per unit volume of water treated to a cost for the resource	113
5.5	Costing of different levels of service of sanitation	114
5.6	Preliminary conclusions on costing	118
6	APPLICATION OF THE MODEL TO HARTBEESPOORT DAM CATCHMENT	120
6.1	Choice of Hartbeespoort Dam for application of the model	120
6.2	Time periods used in modelling	121
6.3	Construction - or reconstruction - of past, present and future situations/scenarios	121
6.4	Hydrology and nutrient export	122
6.5	Dam balance and nutrient budget	130
6.6	Nutrient algae	131
6.7	Extrapolation to the future	135
7	APPLICATION OF MODEL TO GAUTENG PROVINCE	140
8	CONCLUSIONS, RECOMMENDATIONS and FURTHER WORK	143
8.1	Conclusions	143
8.2	Recommendations	149
8.3	Further work	149
	REFERENCES	150
	APPENDIX: SPREADSHEET MODEL OUTPUT	161
