

TABLE OF CONTENTS

EXECUTIVE SUMMARY	I
PROJECT OVERVIEW	i
SELECTION OF RESEARCH SITES	ii
DATA COLLECTION	iii
STATIC GEOCHEMICAL ASSESSMENT TECHNIQUES	iii
KINETIC GEOCHEMICAL ASSESSMENT TECHNIQUES	v
CONCLUSIONS	vii
ACKNOWLEDGEMENTS	IX
TABLE OF CONTENTS	XI
LIST OF TABLES	XV
LIST OF FIGURES	XVII
GLOSSARY AND ABBREVIATIONS	XXI
CHAPTER 1 INTRODUCTION	1
1.1 Background and rationale	1
1.2 Objectives	1
1.3 Research products	2
1.4 Capacity building with reference to previously disadvantaged groups	3
1.5 Outline of the report	3
1.6 General	3
CHAPTER 2 SITE CHARACTERISATION	4
2.1 Introduction	4
2.2 Site selection	4
2.2.1 Old partially flooded compartment as test site	4
2.2.2 Working compartment as test site	5
2.3 Brandspruit colliery site	6
2.3.1 General locality description	6
2.3.2 Area selected	7
2.3.3 S7 compartment description	14
2.4 Hlobane site characterisation	17
2.4.1 Introduction	17
2.4.2 Overview of Hlobane colliery	17
2.4.3 Characterisation of Boomlager IV adit	25
2.5 Summary	29
2.5.1 Site selection	29
2.5.2 Brandspruit site	29
2.5.3 Hlobane site	30
2.6 Recommendations	30
2.6.1 Site selection	30
2.6.2 Monitoring programme	30
2.6.3 Parameters for site characterisation	30
CHAPTER 3 SAMPLING AND WATER MONITORING	32
3.1 Introduction	32
3.2 Guidelines for sampling	32
3.2.1 Solid sampling	32
3.2.2 Water sampling and monitoring	34
3.3 Brandspruit site	35
3.3.1 Solid sampling	35
3.3.2 Water monitoring and sampling program	49
3.4 Hlobane site	50
3.4.1 Solid rock sampling	51
3.4.2 Water sampling and monitoring programme	52
3.5 Summary	52

3.5.1	Solid sampling.....	52
3.5.2	Water sampling and monitoring programme.....	53
3.6	Recommendations.....	53
3.6.1	Solid sampling.....	53
3.6.2	Water sampling and monitoring programme.....	53
CHAPTER 4	STATIC GEOCHEMICAL ASSESSMENT METHODS	54
4.1	Introduction.....	54
4.2	Static geochemical methodologies.....	55
4.2.1	ABA terminology	56
4.2.2	Static tests used in this study.....	56
4.2.3	Detailed ABA methods used in this study.....	56
4.3	ACID BASE ACCOUNTING FOR BRANDSPRUIT S7 COMPARTMENT.....	57
4.3.1	Acid Base Accounting results	58
4.3.2	Calculated parameters from ABA	62
4.3.3	Interpretation of results	63
4.3.4	Interpretation of individual samples	63
4.3.5	Using interpretative diagrams	63
4.3.6	Acid Base Accounting by coal and lithological unit.....	69
4.3.7	Statistical description of results.....	71
4.3.8	Sample size estimates	73
4.3.9	Conclusions based on only ABA data.....	73
4.3.10	Incorporation of other analytical test results	74
4.3.11	Volumetric/mass determinations.....	76
4.3.12	Conclusions.....	78
4.4	Static tests for Hlobane site.....	79
4.4.1	Sample preparation and analysis.....	79
4.4.2	Results and interpretation	79
4.5	Summary and conclusions	86
4.5.1	Acid Base Accounting	86
4.5.2	Mineralogy and geochemistry.....	86
CHAPTER 5	HUMIDITY CELL TESTS.....	88
5.1	Introduction.....	88
5.2	Literature survey.....	88
5.2.1	Kinetic tests.....	88
5.2.2	Humidity cells.....	89
5.3	Brandspruit Colliery	93
5.3.1	Sample size and humidity cell numbers	93
5.3.2	Results	94
5.3.3	Discussion and summary.....	106
5.4	HLOBANE SITE	107
5.4.1	Sample size and humidity cell numbers	107
5.4.2	Results	107
5.4.3	Summary.....	117
CHAPTER 6	EQUILIBRIUM GEOCHEMICAL MODELLING.....	118
6.1	Principles and theory of equilibrium geochemical modelling	118
6.1.1	Review of major computer geochemical models	118
6.1.2	Phreeqc.....	119
6.1.3	Geochemist's Workbench	121
6.1.4	MINTEQAK	121
6.1.5	Others	122
6.1.6	Database for geochemical modelling.....	123
6.1.7	Limitations of geochemical modelling	123
6.2	Equilibrium models	124
6.2.1	Aqueous speciation and mineral saturation index	124

6.2.2	Inverse modelling	125
6.2.3	Surface complexation	125
6.2.4	Activity diagram.....	126
6.2.5	Buffering.....	126
6.2.6	Automatic balancing, calculation and solving of chemical reaction and thermodynamic parameters.....	126
6.2.7	Batch reactions including solution mixing and evaporation	127
6.3	Brandspruit site.....	127
6.3.1	Interpretation of raw water quality data.....	127
6.3.2	Aqueous speciation and mineral saturation index	136
6.3.3	Inverse modelling.....	139
6.3.4	Stability diagrams.....	140
6.3.5	Sorption process	142
6.4	Hlobane site.....	144
6.4.1	Interpretation of water quality data.....	144
6.4.2	Speciation and mineral saturation index.....	144
6.4.3	Inverse modelling.....	147
6.5	Chapter summary.....	148
6.5.1	Computer packages.....	148
6.5.2	Geochemical models	148
6.5.3	Modelling results for Brandspruit Colliery	148
6.5.4	Modelling results for Hlobane Colliery	149
6.6	Recommendations.....	149
6.6.1	Equilibrium geochemical models	149
6.6.2	Computer software packages	149

CHAPTER 7 KINETIC MODELING150

7.1	Background theory for mineral reaction rates	150
7.2	Data requirements for kinetic geochemical modeling	152
7.3	Brandspruit site.....	153
7.3.1	Data preparation and input data for modelling.....	154
7.3.2	Development of a conceptual model	160
7.3.3	Modelling results	160
7.3.4	Model calibration	163
7.4	Boomlager IV at Hlobane colliery	166
7.4.1	Data input for kinetic modelling.....	166
7.4.2	Development of a conceptual model	168
7.4.3	Kinetic modelling	169
7.4.4	Model calibration	172
7.5	Sensitivity analyses	178
7.6	Chapter summary.....	180

CHAPTER 8 RECOMMENDATIONS FOR DWAF'S BEST PRACTICE GUIDELINES182

8.1	Introduction.....	182
8.2	AMD prediction	182
8.2.1	Objectives of AMD prediction.....	182
8.2.2	Critical questions to ask and answer in AMD prediction.....	182
8.3	Prediction technique evaluation and validation	183
8.3.1	Static Tests (specifically ABA)	183
8.3.2	Kinetic tests (specifically HC).....	185
8.3.3	Equilibrium modelling.....	186
8.3.4	Kinetic modelling	189
8.4	Usefulness, uncertainties and limitations	190
8.5	Decision making tree	191

CHAPTER 9 GUIDELINES FOR GEOCHEMICAL DATA COLLECTION.....	193
9.1 Introduction.....	193
9.2 Solid geochemical sampling.....	193
9.2.1 Consideration of sampling programme design	193
9.2.2 Underground solid sampling	193
9.2.3 Floor Sampling.....	194
9.2.4 Borehole drilling and sampling.....	195
9.3 Geochemical analytical techniques	195
9.3.1 Mineralogy.....	195
9.3.2 Particle size distribution (PSD)	195
9.3.3 Mineral surface area determination	195
9.3.4 Solid geochemistry (XRF)	195
9.3.5 Pore water quality and water extraction.....	196
9.4 Water sampling, monitoring and analyses	196
9.4.1 Objectives and strategy	196
9.4.2 Water monitoring programme	196
9.4.3 Water quality analyses.....	197
9.4.4 Stratified water sampling and analysis	197
9.5 Static (ABA) tests	197
9.6 Kinetic tests	198
9.6.1 Possible methods.....	198
9.6.2 Objectives	198
9.6.3 Data collection and reporting from HC (ASTM) tests.....	198
9.7 Data collection for equilibrium geochemical modelling	199
9.8 Data required for kinetic geochemical modelling	199
9.9 Other data collection.....	200
9.9.1 Meteorological data.....	200
9.9.2 Mining methods and historic data	200
9.9.3 Geohydrology and groundwater.....	200
9.10 Quality assurance control	201
 CHAPTER 10 SUMMARY, CONCLUSIONS AND RECOMMENDATIONS	 202
10.1 Project review and summary	202
10.2 Conclusions	203
 CHAPTER 11 REFERENCES.....	 205
 APPENDIX A.....	 209
APPENDIX B.....	210
