

Table of Contents

Executive Summary.....	iii
Acknowledgements.....	vii
Table of Contents.....	ix
Lists of Tables.....	xi
1. Introduction.....	1
1.1 Ferrite powder as a product.....	1
1.2 Ferrite production from acid mine drainage.....	1
1.3 The ambient temperature ferrite process.....	2
1.3.1 The contact stabilization reactor.....	4
1.3.2 The oxidation reactor.....	5
1.3.3 The aging tank.....	6
1.4 ATFP versus the HDS process.....	7
1.5 Project objectives.....	8
1.6 Approach.....	9
2. Laboratory-scale tests.....	10
2.1 Lime dosage requirements.....	10
2.2 Continuous process.....	11
2.3 Conclusion.....	17
3. Initial pilot plant design and operation.....	18
3.1 Objectives for operating the pilot plant.....	18
3.2 Design principles.....	18
3.2.1 Contact stabilization reactor.....	18
3.2.2 Settler.....	19
3.2.3 Oxidation tank.....	19
3.2.4 Aging tank.....	20
3.3 Start-up and commissioning.....	20
3.3.1 Ferrite seed.....	20
3.3.2 Lime.....	20
3.4 Planned experimental program.....	21
3.4.1 Start-up strategy.....	21
3.5 Failures on the pilot plant.....	22

3.5.1 Operating pH.....	22
3.5.2 Laboratory batch tests to simulate contact stabilization reactor.....	23
3.5.3 Pilot plant contact stabilization reactor.....	24
4. Laboratory-scale investigation on Grootvlei mine water.....	28
4.1 Introduction.....	28
4.1.1 The aqueous ferrous concentration in the AMD.....	28
4.1.2 The pH of the contact stabilization reactor.....	28
4.1.3 The retention time in the contact stabilization reactor.....	28
4.1.4 The ferrite seed concentration in the contact stabilization reactor.....	28
4.1.5 The upper limit of the ferrite intermediate concentration in the contact stabilization reactor.....	29
4.1.6 The ferrite intermediate concentration on the seed.....	29
4.1.7 The anion concentrations in feed: sulfate, chloride and carbonate.....	29
4.2 Operating pH of the contact stabilization reactor.....	30
4.3 Effects of low grade lime and retention time.....	35
4.4 Effect of seed concentration.....	40
4.5 Conclusions.....	46
5. Conclusion.....	47
6. Proposal for future work.....	48
6.1 Laboratory phase 1: Contact stabilization reactor.....	48
6.2 Laboratory phase 2: Oxidation and aging tests.....	49
6.3 Pilot scale tests.....	50
6.4 Time scales.....	50
6.5 Costs.....	51
7. References.....	52
