

# TABLE OF CONTENTS

1 INTRODUCTION AND OBJECTIVES .....	1
2 ON SITE SANITATION OPTIONS .....	1
2.1 Ventilated Pit Latrines (VIP) .....	4
2.2 Single Vault Urine Diversion Toilet .....	5
2.3 Double vault urine diversion toilet .....	6
3 REGIONAL EXPERIENCE OF SUPERSTRUCTURES .....	7
4 COMMUNITY INVOLVEMENT .....	14
5 STRUCTURAL REQUIREMENTS FOR VIP SUPERSTRUCTURES .....	17
6 SUPERSTRUCTURES AVAILABLE .....	18
6.1 Moveable superstructures .....	18
6.2 Non moveable superstructures.....	26
7 PRELIMINARY INVESTIGATIONS BY THE UNIVERSITY OF PRETORIA .....	28
7.1 Technical requirements for options initially investigated .....	28
7.2 High strength concrete .....	29
7.3 Lightweight building blocks .....	34
7.4 Preliminary conclusions .....	37
8 SYSTEMS DEVELOPED AT THE UNIVERSITY OF PRETORIA .....	37
8.1 Base system .....	37
8.2 High strength wall panels .....	39
8.3 Foamed concrete block walls .....	41
9 STRENGTH TESTING .....	43
9.1 Background .....	43
9.2 Concrete strength .....	44
9.3 Base system .....	45
9.4 High strength panels .....	49
9.5 Block walls .....	51
10 FINANCIAL VIABILITY OF DIFFERENT OPTIONS .....	52
11 TECHNOLOGY TRANSFER .....	53
12 CONCLUSIONS AND RECOMMENDATIONS .....	58
13 LIST OF REFERENCES.....	59
APPENDIX A .....	62
APPENDIX B .....	69
APPENDIX C .....	72
APPENDIX D .....	75
APPENDIX E .....	77
APPENDIX F .....	78
