

Table of Contents

Executive Summary	iii
Acknowledgements	xiii
Table of Contents	xv
List of Figures	xvii
List of Tables	xix
1. Introduction	1
1.1 Introduction and motivation for the investigation	1
1.2 Aims	4
1.3 Approach to the Study	4
2 Literature review and background information	5
2.1 Research world wide	6
2.1.1 Australia	6
2.1.2 India	7
2.1.3 Israel	7
2.1.4 North America	8
2.2 Previous research and findings regarding Vaalharts	8
2.2.1 Arend Streutker 1971	9
2.2.2 Gombar Erasmus 1976	9
2.2.3 Herold & Bailey 1996	10
2.2.4 GB Simpson 1999	11
2.2.5 GHT Consulting (JJH Hough and DC Rudolph) 2003	11
2.2.6 Ellington, Usher & Van Tonder 2004	12
2.3 Land type and Geology	13
2.4 Surface runoff	16
2.5 Rainfall	16
2.6 Temperature and Evapotranspiration	17
2.6.1 Temperature	17
2.6.2 Evapotranspiration	17
2.7 Topography	19
2.8 Soils	20
2.9 Infrastructure	26
2.10 Crops	26
2.10.1 Types of crops	26
2.10.2 EC tolerance of Crops	26
2.11 Irrigation Practices	27
2.12 Inverse Distant Weight (IDW) Interpolation Method	30
3 Field study and Geohydrology data collection	32
3.1 Introduction	32
3.2 Installing piezometers	32
3.2.1 Procurement and labour	32
3.2.2 Positioning of the Piezometers	32
3.2.3 Piezometer construction	35
3.2.4 Survey	36
3.3 Water Level Monitoring	37
3.3.1 Measurements	38
3.3.2 Water Level and Surface Correlation	38
3.3.4 Water Level contour maps	40

3.4 EC Monitoring	45
3.4.1 EC a tool for stratification determination	45
3.4.2 EC measuring	45
3.4.3 Electrical conductivity (EC) mapping	46
3.4.4 EC Values of Harts River Water	51
3.5 Saturated Hydraulic Conductivity of water logged soils (K)	53
3.5.1 The effect of soil properties	53
3.5.2 Site selection	53
3.5.3 On site tests	54
3.5.4 Conversion of site readings	55
3.5.5 Comparing Hydraulic Conductivity and Electrical Conductivity	57
3.5.6 Generating a contour map of the K Values	58
3.5.7 Comparing K Values with clay content and EC	58
3.6 Drainage	60
3.6.1 EC Monitoring	60
3.6.2 Drainage water flows	61
3.7 Groundwater Chemistry	62
3.7.1 Chemical properties	63
3.7.2 Hardness and sodium adsorption ratio	65
3.7.3 Chloride sampling and analyses	68
3.7.4 Total Dissolved Solids	71
4 Numerical Modelling	72
4.1 What is a Model	72
4.2 Conceptual inputs	73
4.3 Numerical model	73
4.4 Drain Modelling	76
4.5 Water Budget	78
5 Salt and water balance	80
5.1 Salt balance	80
5.1.1 Leaching Requirement	80
5.1.2 Flow beneath subsurface drains	81
5.2 Water balance.....	83
5.2.1 Water loss estimation	83
5.2.2 Inflow, outflow and leaching requirement balance	84
6 Findings and Recommendations	86
6.1 Findings	86
6.2 Recommendations	89
7 References	91
