

TABLE OF CONTENTS

Executive summary	iii
Acknowledgement	viii
Table of contents	ix
List of tables	xii
List of figures	xiii
1. Introduction	1
2. Experimental	4
2.1 Materials	4
2.1.1 Natural Zeolites and Feed solutions used	4
2.1.2 Reagents and Apparatus used	4
2.2 Experimental setup	4
2.3 Methods	5
2.3.1 Characterisation of the three natural zeolites	5
2.3.2 Determination of ion-exchange capacity	6
2.3.3 Determination of densities	6
2.3.4 Determination of surface areas	6
2.3.5 Determination of attrition losses	6
2.3.6 Sorption isotherms	6
2.4 Performance of clinoptilolite for ammonia-nitrogen removal from water and secondary effluent	8
2.4.1 Determination of ammonia-nitrogen removal from Pretoria tap water spiked with approximately 10 and 20 mg/l ammonia-nitrogen using powdered clinoptilolite (Pratley 1)	8
2.4.2 Determination of ammonia-nitrogen removal from tap water spiked with approximately 10 and 20 mg/l ammonia-nitrogen using conditioned powdered clinoptilolite (Pratley 1) ...	9
2.4.3 Determination of ammonia-nitrogen removal from Sunderland Ridge secondary effluent using powdered clinoptilolite	9
2.4.4 Establishment of breakthrough curves (tap water spiked with NH ₄ Cl)	9
2.4.5 Establishment of elution curves	10
2.4.6 Regenerant reuse	10
2.4.7 Ammonia removal with air stripping from the spent regenerant	10
2.5 Pilot studies	10
2.5.1 Methodology	10
2.5.2 Experimental set-up	11
3. Results and discussion (laboratory studies)	16
3.1 XRD and XRF analyses	16
3.1.1 XRD patterns of the zeolites	16
3.1.2 XRF analysis	17
3.2 The total ion-exchange capacities and densities of the zeolites ...	19
3.3 Surface areas of the zeolites	20
3.4 Attrition losses of the zeolites	21
3.5 Sorption isotherms (Langmuir and Freundlich plots)	21
3.5.1 Effect of contact time on ammonia-nitrogen removal (Pratley 1 and 2 clinoptilolites)	21
3.5.2 Langmuir and Freundlich	24
3.6 Ammonia-nitrogen removal with powdered clinoptilolite	28
3.6.1 Efficiency of unconditioned and conditioned powdered Clinoptilolite (Pratley 1) for ammonia-nitrogen removal from tap water spiked with approximately 10 and 20 mg/l ammonia-nitrogen	29

3.6.2 Efficiency of different (Pratley 1, Pratley 2 and Heidelberg) unconditioned and conditioned clinoptilolites for ammonia-nitrogen removal from secondary effluent ...	29
3.6.2.1 Pratley 1	29
3.6.2.2 Pratley 2	30
3.6.2.3 Heidelberg	32
3.7 Effect of loading flow rate, particle size, feed concentration and pH on the performance of clinoptilolite for ammonia-nitrogen removal	33
3.7.1 Effect of loading flow rate and particle size	33
3.7.2 Effect of the initial feed concentration	36
3.7.3 Effect of pH	37
3.7.4 Ammonia-nitrogen removal from clinoptilolite	38
3.8 The effect of a number of runs on the output capacity of clinoptilolite for ammonia-nitrogen removal	39
3.8.1 Effect of a number of runs on the bed volumes produced at breakthrough using tap water as feed	39
3.8.2 Effect of a number of runs on the bed volumes produced at breakthrough secondary sewage as feed	40
3.8.3 Effect of regenerant reuse on the output capacity	41
3.8.4 Ammonia-nitrogen removal from spent regenerant with airstripping.....	43
3.8.5 Effect of regenerant reuse on run length using particle size of 0,25-0,7 mm (Pratley 1)(Secondary effluent)	44
3.8.6 Effect of regenerant reuse on run length using particle size of 0,25-0,7 mm (Pratley 2)(Secondary effluent)	45
3.8.7 Effect of regenerant reuse on run length using less regenerant (15 BV) (Pratley 2)(Secondary effluent)	46
3.9 Operational costs	48
3.9.1 Powdered clinoptilolite	48
3.9.2 Column studies	49
4. Results and Discussion (Pilot studies)	49
4.1 Breakthrough curves after chemical regeneration	49
4.2 Breakthrough curves after different loading flow rate	50
4.3 Elution curves	50
4.3.1 Elution curves after loading cycles 10 to 13	50
4.3.2 Elution curves after laboratory, pilot and literature data	51
4.3.3 Elution curves for sodium, potassium, calcium and magnesium	51
4.4 Backwash flow rate and bed expansion	54
4.5 Ammonia speciation	55
4.6 Breakthrough curves after biological regeneration	55
4.7 Process design criteria	56
4.8 Proposed design options	58
4.9 Costs	62
5. Summary and conclusions	63
6. References	67
Appendix A	69
Appendix B	71
Appendix C	84
Appendix D	87
Appendix E	89
Appendix F	91
Appendix G	93

Appendix H	96
Appendix I	103
Appendix J	105
Appendix K	107
Appendix L	108
Appendix M	109
Appendix N	110
Appendix O	111
Appendix P	113
