

TABLE OF CONTENTS

EXECUTIVE SUMMARY.....	III
ACKNOWLEDGEMENTS.....	VI
CHAPTER 1 INTRODUCTION	1
1.1 Background.....	1
1.2 Objectives for the technology transfer of SAPWAT, the verifying of its output and the evaluation of its adoption potential	3
CHAPTER 2 IMPORTING CROP DATA EN MASSE.....	4
2.1 Introduction	4
2.2 Methodology	4
2.2.1 Getting there	4
2.2.2 The import file	5
2.2.3 after importation.....	6
CHAPTER 3 TESTING THE CORRECTNESS OF SAPWAT3 ESTIMATES	7
3.1 Introduction.....	7
3.1.1 Evaporation pans.....	8
3.1.2 Blaney-Criddle method	8
3.1.3 Radiation method	8
3.1.4 Penman method	9
3.1.5 Penman-Monteith approach	9
3.2 Problem	10
3.3 Objectives	10
3.4 Theoretical background	11
3.5 Program	13
3.6 Methodology	14
3.7 Results and discussion	15
3.7.1 Correlation between daily SAPWAT3 estimated and in-field measured evapotranspiration.....	15
3.7.2 Correlation between cumulative estimated and measured data	17
3.7.3 Correlation of cumulative estimated and measured data over time.....	17
3.7.4 Comparing crop coefficients with measured data	18
CHAPTER 4 ACCEPTANCE OF SAPWAT3 AS AN IRRIGATION WATER PLANNING TOOL	20
4.1 Introduction	20
4.2 Motivation	20
4.3 Objectives	21
4.4 Literature overview	21
4.4.1 The adoption process	21
4.4.2 Rates of adoption	22
4.4.3 Characteristics of innovations	22
4.5 Methodology	23
4.6 Results and Discussion	25
4.6.1 Acceptance of SAPWAT	25
4.6.2 Acceptance of SAPWAT3	29
4.6.3 SAPWAT3 and its uses	35
4.6.4 Perceived usefulness and ease of use	37
4.6.5 Perceived ease of use	49
4.6.6 SAPWAT3 support	55
CHAPTER 5 CONCLUSION	59
REFERENCES	63
APPENDIX A LIST OF CROPS, CROP-OPTIONS AND PLANTING DATES	64
