

## Table of Contents

EXECUTIVE SUMMARY .....	i
Table of Contents .....	v
List of Tables .....	vii
List of Figures .....	viii
List of Appendices .....	x
Nomenclature .....	xi
Abbreviations .....	xii
1.0 INTRODUCTION .....	1
1.1 Background .....	1
1.2 Objectives .....	6
1.3 Methodology .....	6
1.4 Layout of the Report .....	7
2.0 REVISED PROBABILISTIC AND A NEW EMPIRICAL APPROACH FOR SEDIMENT YIELD PREDICTION .....	8
2.1 Introduction .....	8
2.2 Sources of Information .....	8
2.3 Quality of data, analysis and validation .....	9
2.3.1 Mean Annual Runoff and Trap Efficiency .....	10
2.3.2 Effective Catchment Area .....	12
2.4 Determination of sediment yields from reservoir sediment deposit data.....	12
2.5 Calculation of sediment yields from river suspended solids data .....	16
2.6 Probabilistic sediment yield prediction methodology .....	17
2.6.1 Demarcation of new regions.....	17
2.6.2 Soil erosion hazard classes .....	22
2.6.3 Probabilistic analysis of observed sediment yield data .....	24
2.6.4 Multiplication factors, confidence intervals and limits .....	29
2.6.5 Steps for the prediction of sediment yields – probabilistic approach .....	30
2.6.6 Verification of results .....	31
2.6.7 Example to illustrate the application of the probabilistic method .....	35
2.7 Empirical sediment yield prediction methodology .....	38
2.7.1 Concept of total input stream power .....	38
2.7.2 Dependent and independent variables .....	39
2.7.3 The concept of multiple regression analysis.....	44
2.7.4 Results and derived equations .....	44
2.7.5 Confidence Intervals .....	46
2.7.6 Verification and analysis of results .....	46
2.7.7 Specific considerations associated with each region when estimating sediment yields .....	49
2.7.8 Illustration of the application of the empirical method .....	55
2.8 Comparison of the empirical and probabilistic approaches .....	58
3.0 MATHEMATICAL MODELLING OF SEDIMENT YIELD .....	59
3.1 Catchment erosion and sediment yield modelling .....	59
3.1.1 Models for erosion and sediment yield modelling .....	59
3.1.2 SHETRAN AND ACRU .....	61
3.1.3 General comparative analysis of SHETRAN and ACRU models .....	62
3.1.4 The SHETRAN model .....	64
3.2 Description of the study area for SHETRAN application .....	67
3.3 Model set up – SHETRAN .....	68
3.4 Flow calibration .....	72

3.5	Flow validation .....	74
3.6	Sediment load calibration and validation .....	76
3.7	Identification of high sediment yield areas .....	78
3.8	Conclusions on the application of the SHETRAN modelling system .....	81
3.9	ACRU model set up, validation and simulation .....	82
3.10	ACRU Application .....	82
4.0	PROPOSED SEDIMENT MONITORING IN SOUTH AFRICA .....	84
4.1	Background .....	84
4.2	Reservoir surveys .....	84
4.3	River sediment sampling .....	85
4.4	River sediment concentration sampling network .....	93
5.0	CONCLUSIONS .....	94
5.1	Criteria for the choice of a sediment yield prediction method .....	95
5.2	Numerical model constraints and strengths .....	95
6.0	RECOMMENDATIONS.....	97
7.0	REFERENCES .....	98
