## PART D TERMS OF REFERENCE / SCOPE OF WORK

### 1. BACKGROUND AND INTRODUCTION

The WRC operates as legislated by the Water Research Act (Act 34 of 1971) and is an entity of national importance to ensure water security, support to the DWS and water sector stakeholders through funding of research entities (universities, consultants and SMMEs). The Primary Function of the WRC is to (1) Promote coordination, cooperation, and communication in water research; (2) Establish water research needs and priorities; (3) Stimulate and fund water research according to priority; (4) Promote the effective transfer of information and technology; and (5) Enhance knowledge and capacity building within the water sector.

### 2. SCOPE OF WORK: REQUIREMENT / SPECIFICATION

The objective of this request for quotation is to invite professional service providers to submit quotations for the layout of the journal over the period 1 May 2026 to 30 April 2028 (10 issues – *Water SA* is a quarterly publication, and one special issue per year is also included in this quotation). Prices must be valid for the full period. The quote must include estimated turnaround time, i.e., the time it takes to deliver the PDF from receipt of the article.

*Water SA* is a scholarly journal, published online by the Water Research Commission. The layout of *Water SA* is currently done in Adobe InDesign, according to a specific style; a sample of the current style in Adobe InDesign will be provided.

Articles are supplied in MS Word. Images are usually embedded in the document or sent separately in their original format, e.g., Excel or JPG. Images are converted to a suitable format for InDesign and are never redrawn, but minor editing of images (e.g. removal of heading text) may on occasion be requested. Equations created in Word or inserted using equation-building software must be redrawn in layout. After layout, the article is converted to PDF and sent to the Editor, who sends it to the author(s) for approval. Minor corrections to content and layout may be requested by the Editor prior to publication.

As the scope of *Water SA* includes mathematical and physical sciences, articles may contain, in addition to a number of figures and tables, equations (often inserted by the authors using equation-building tools), chemical formulae, subscripts, superscripts, and several italicised words and phrases.
