

Group B: 14:00:

Convener: Bongani & Barbara UK.

Rapporteur : Barbara UK..

- Theme: building on indigenous

Water arrangements:

- Holistic focus on water for multiple uses & re-cycling
- Single use water sub -sectors fail to meet people
- Multiple water needs
- Women certainly need water for domestic and productive uses
- Domestic plus approach : entry point domestic users but not excluding small scale productive users.
- Irrigation – plus approach same with irrigation and entry point .
- Multiple use water services by design (MVS) priority is set buy community both men and women.
- Knowledge on how to dig well etc. and environment should be conserved for survival
- To be documented participatory resource- technology –use- management arrangements Assessment.
- Women are knowledgeable because they migrate use
- Indigenous men dominate technology construction support for women
- Partly related to land tenure
- Myth that people should not watch well digging be cause that no water will be found
- Monopolization of technical knowledge by men or service to share with domestic
